Tianrong Medical Group Inc.'s (OTC:TNMD) CEO Publishes a Letter to Shareholders

The Future of Real Estate Through Tokenization

Okemos, Michigan Sep 8, 2025 (Issuewire.com) - Tianrong Medical Group Inc. (OTC: TNMD) is bringing a revolution to the real estate industry. The company's CEO, Curtis L. Philpot, has recently shared a letter to its shareholders to let them know that the company has taken a significant step forward with the acquisition of Pillar Properties Inc. The Michigan-based real estate holdings company will make acquisitions, which establishes a foundation. Through the letter, the CEO expresses that the company is preparing to build one of the most innovative ventures in the real estate sector: the eventual creation of a tokenized Real Estate Investment Trust (REIT).

According to the CEO's letter, this acquisition is more than an expansion of assets. It is the cornerstone of a vision to fundamentally change the way real estate is owned and accessed, moreover, how it is invested in. The company is getting ready to harness the power of tokenization as it aims to combine the traditional strength of real estate with the efficiency and accessibility of blockchain technology. Its long-term strategy is to open the doors of real estate investing to a broader universe of investors while delivering sustainable value to the shareholders. Through tokenization, the company is rapidly building the future of real estate.

Real estate is one of the proven asset classes. However, people's access to it has been limited by high capital requirements, illiquidity, and geographic restrictions. Curtis mentions in his letter how tokenization offers a solution to these barriers. It converts ownership rights of physical properties into secure digital tokens recorded on the blockchain. With this, the company can enable fractional ownership, where investors of all sizes can participate in high-value properties, and liquidity, where tokens can be traded on compliant platforms. The company will also enable transparency, as blockchain provides immutable records of ownership and transactions. This will also bring efficiency and global reach for the company.

Curtis L. Philpot shares in his letter to shareholders that this future is not a distant concept. By aligning traditional real estate with blockchain innovation, Tianrong Medical Group Inc. is positioning itself to lead in this next era of financial and real estate transformation. The company's strategic focus is on five core sectors: Residential Housing, Commercial Assets, Development Projects, Senior Living and Healthcare, and Telecom Infrastructure. The CEO further shares in his letter that the company will be showcasing its first acquisition shortly, marking the beginning of a portfolio that will serve as the foundation for this vision. Each asset that is brought into the company is carefully selected to strengthen both near-term cash flows and long-term shareholder value. He further ensures that when launched, the company's tokenized REIT stands as a model for transparency, innovation, and accessibility.

In the letter, he also asks for the trust and support of the company's shareholders, as they are vital to this mission. With the acquisition of Pillar Properties and the path toward a tokenized REIT, Tianrong Medical Group Inc. (OTC: TNMD) is well-positioned to create sustainable, long-term value for all stakeholders.
