# Tricky Websolutions: Helping Businesses Grow with Blockchain and AI/ML Solutions

Tricky Websolutions is a trusted Blockchain development company and an AI app development company.

Chandigarh, India Jan 3, 2026 (Issuewire.com**)** - In today's fast-changing digital world, Tricky Websolutions, a trusted Blockchain development company and AI app development company, is helping businesses of all sizes. By using Blockchain technology and Artificial Intelligence (AI) & Machine Learning (ML), we are improving their operations. Our Blockchain and AI/ML services help companies build secure, transparent, and efficient systems.

We create solutions like smart contracts, decentralized applications (dApps), and private blockchains that allow businesses to run faster and safer without relying on third-party applications or individuals. These solutions are especially useful for industries such as finance, healthcare, supply chain, and real estate.

At the same time, our AI and ML services help businesses turn their raw data into smart decisions. We develop AI-powered applications that not only analyze data and predict future trends but also automate repetitive tasks. This helps companies save time, reduce errors, and better understand their customers.

As a leading Blockchain development company and AI app development company, we focus on delivering easy-to-use, reliable, and powerful solutions. Whether you want to create a blockchain system for secure transactions or an AI-powered app to improve customer experience, our experienced team is always ready to help you achieve your goals.

"We want to help businesses succeed by using the latest technology in a simple way," said Sunny Sharma and Amit Kamal, Managing Directors at Tricky Websolutions. "Our goal is to make blockchain

and AI/ML technology easy to understand and useful for every business."
