

UK Financial Ltd Announces The Launch Of Maya Preferred's Corporate Website, Accelerates Path to Becoming SEC Compliant

The Maya Preferred New Corporate Website Is Now Live And UK Financial Ltd anticipates An SEC Approval For Its Regulated Security Token. Making Maya Preferred PRA Preferred Class Regulated Security Token First Ever Fully Compliant Token.

Walthamstow, London Sep 9, 2025 ([Issuewire.com](https://www.issuewire.com)) - UK Financial Ltd. announced today that The Maya Preferred Project, a pioneering force in the blockchain and cryptocurrency space, is thrilled to announce the launch of its new corporate website.

<https://MayaPreferred.io>

This milestone marks a significant step forward in the company's mission to become the first fully compliant ERC-3643 security token globally.

In the coming weeks, the Maya Preferred Project will be executing listing agreements with CATEX EXCHANGE for the Wrapped Maya Preferred PRA (WMPRA) token. Current holders of the Maya Preferred PRA token will benefit from an incredible 400,000x leverage opportunity, as every 1 MPRA token will be exchanged for 400,000 coins of the Maya Preferred Retirement Plan Program Wrapped Token (RPWMPRA). Both newly wrapped tokens will maintain a 1:1 peg with the MPRA token price.

The company is also set to reintroduce three tokens that were previously part of UK Financial Ltd.'s business plan and the tokenized projects ecosystem. These already made and verified, upgraded tokens will once again be integrated into the UK Financial Ltd ecosystem.

Additionally, a new token will be introduced, a groundbreaking mutual fund like token that will instantly become an asset enhancement tokenized project that will revolutionize how individuals and corporations utilize leveraged assets.

This new mutual fund-like token will be the owner of all UK Financial Ltd.'s assets, which the company is in the process of individually tokenizing each and every major asset it currently owns. Then the company will deposit each asset into the uk-financial-ltd-corporate-assets.eth wallet, which currently is held at Coinbase. Once this deposit into the corporate wallet has been executed, it instantly makes all of the company's assets, even ones that were once non-liquid, able to be claimed and utilize leverage on all its assets by a multiple exceeding 1000% of the original dollar value of the assets. This innovative approach will reshape the financial landscape, providing investors with unparalleled opportunities for growth at a much more rapid rate.

In line with its commitment to transparency and security, Maya Preferred Project will be launching Maya Media, a new platform hosted on WhatsApp, where UK financial executives and team members will exclusively interact with investors. This platform will enforce strict identity verification policies, ensuring a safe environment for all participants.

The company is working closely with legal representation and Security and Exchange Commission attorneys to prepare for the historic filing of its new ERC-3643 security token, Maya Preferred PRA Preferred Class Regulated Security Token (SMPRA).
