

3v-Hosting Launches New Line of High-Performance GPU Dedicated Servers

3v-Hosting, a European hosting provider known for its reliability and developer-oriented infrastructure, has officially launched a new line of GPU Dedicated Servers

Amsterdam, Netherlands Oct 8, 2025 ([Issuewire.com](https://www.issuewire.com)) - 3v-Hosting, a European hosting provider known for its reliability and developer-oriented infrastructure, has officially launched a new line of **GPU Dedicated Servers** designed for AI workloads, machine learning, video rendering, and other compute-intensive applications.

The new service offers enterprise-grade NVIDIA and AMD GPUs—including **H100, L40S, A100, and MI210** — combined with high-frequency CPUs, NVMe storage, and 10 Gbps network connectivity. Each configuration can be customized to match the exact performance and scalability needs of the client.

“Our goal was to make high-end GPU computing accessible to startups, researchers, and creative professionals,” said the 3v-Hosting technical team. *“These servers deliver exceptional performance, flexibility, and transparency—everything that demanding projects require.”*

GPU Dedicated Servers are hosted exclusively in **state-of-the-art data centers in the Netherlands**, ensuring low-latency access across Europe and beyond. Clients can train neural networks, render complex 3D environments, or deploy AI-powered applications in secure, isolated environments with full root access.
