

APR Bridges Malaysia–China Collaboration to Advance TVET (Electronics & EV Repair Skills) in Selangor

Shah Alam, Selangor Oct 2, 2025 ([Issuewire.com](https://www.issuewire.com)) - APR Electronic Services Sdn. Bhd. has marked a historic milestone by connecting Selangor with one of China's leading digital repair enterprises, ChinaFix (Shenzhen Xinxunwei Technology Co., Ltd.), resulting in the signing of a tripartite Memorandum of Understanding (MoU) involving APR, the Selangor Technical Skills Development Centre (STDC), and ChinaFix.

The MoU, facilitated by APR, establishes a framework for technology transfer, board-level electronic repair, electric vehicle (EV) repair & maintenance, and technical training, aimed at strengthening Selangor's Technical and Vocational Education and Training (TVET) ecosystem.

APR as the Bridge Between Malaysia and China

This landmark collaboration was made possible through APR's initiative in bringing together STDC and ChinaFix, bridging two nations in the field of advanced repair technologies. As the primary enabler, APR will localise and implement ChinaFix's expertise for Malaysia, while STDC will serve as the state's training base to nurture local talent.

APR will also play a pivotal role in driving regional expansion across Southeast Asia, targeting markets such as Thailand, Cambodia, Indonesia, and Myanmar.

Strengthening TVET and Regional Growth

The delegation of Selangor led by Menteri Besar, Dato' Seri Amirudin Shari to Shenzhen, underscoring the state government's commitment to positioning Selangor as a regional hub for TVET.

Through this collaboration, APR is set to elevate Malaysia's capabilities in board-level repair, IT refurbishment, and EV repair & maintenance, ensuring that local engineers are trained with world-class standards.

ChinaFix Global Expertise

ChinaFix is a global leader in electronics repair and training established in 2007, with over 50,000 students trained worldwide. Its facilities include cutting-edge PCB (Printed Circuit Board) repair and EV repair capabilities, widely applied across modern industries. The company also produces internationally recognised technical manuals and reference books for the electronics repair field.

APR's Track Record and Mission

With over 20 years of experience in IT asset disposition (ITAD), refurbishment, and repair, APR has long been a trusted partner in Malaysia's electronics industry. The company is committed to making IT gadgets green & affordable, while creating new opportunities for skilled talent development in Malaysia.

Driving Future Aspirations

This tripartite MoU reflects a shared vision: ChinaFix as the technology provider, STDC as the training hub, and APR as the connector and driver who ensures that Malaysia and Southeast Asia benefit from world-class repair and maintenance expertise.

The partnership is expected to strengthen Selangor's TVET ecosystem, attract investments, and accelerate the state's aspirations to become a leading technology hub in Asia.
