

ArcisAI to Exhibit Next-Gen AI CCTV Ecosystem at IFSEC India 2025

ArcisAI, India's leading AI CCTV brand under Adiance Technologies, will display its integrated smart surveillance solutions powered by Edge AI, Cloud AI, and ArcisGPT from December 11–13, 2025, at Bharat Mandapam, Hall 4, Booth i-10, New Delhi.

Ahmedabad, Gujarat Oct 16, 2025 ([IssueWire.com](https://www.issuewire.com)) - ArcisAI, India's pioneering AI CCTV camera brand, has announced its participation in IFSEC India 2025, the nation's most influential event for security, fire, and safety technologies. The exhibition will take place from December 11–13, 2025, at Bharat Mandapam (Pragati Maidan), New Delhi, where ArcisAI will be located in Hall 4, Booth i-10.

At this year's event, ArcisAI will present a holistic surveillance ecosystem designed for modern enterprises and urban environments. The platform seamlessly integrates Edge AI for on-device intelligence, Cloud AI for centralized analytics, and ArcisGPT — the company's AI-powered video search assistant that delivers instant, contextual insights from recorded footage.

By combining real-time video processing with natural language-based event search, ArcisAI enables security teams to act faster, manage incidents proactively, and reduce dependency on manual monitoring. This innovation represents a major step toward predictive and autonomous surveillance.

"Our participation in IFSEC India 2025 marks an important milestone," said Kushal Sanghvi, Director of ArcisAI. "With Adiance Technologies' long-standing expertise in manufacturing and product design, ArcisAI is redefining what Indian-made security solutions can achieve globally."

Beyond its intelligent camera technology, ArcisAI is also introducing STQC-certified Cloud VMS — a robust, government-approved video management system that ensures data integrity and compliance. The system supports custom cloud storage tiers, real-time event alerts, and multi-location video access, making it ideal for enterprises managing distributed assets.

Adiance Technologies, ArcisAI's parent company, brings two decades of OEM-ODM experience in CCTV manufacturing and embedded systems. With an in-house R&D division and an advanced SMT production facility in Ahmedabad, Adiance supports ArcisAI's innovation with a solid foundation of quality and reliability. This partnership ensures each product is developed, tested, and built entirely in India — aligning with the nation's "Make in India, Innovate for the World" vision.

ArcisAI's technology suite caters to diverse sectors including manufacturing, healthcare, finance, logistics, education, construction, hospitality, and smart city infrastructure. By focusing on data-driven

security and intelligent automation, the company is helping organizations evolve from passive monitoring to active risk prevention and operational visibility.

“We’ve built ArcisAI for the real world — where safety, intelligence, and scalability must work together,” added Hardik Sanghvi, Owner of ArcisAI. “Our solutions are designed to adapt, learn, and continuously improve with every deployment.”

Visitors at IFSEC India 2025 can explore live demonstrations of ArcisAI’s AI cameras, smart analytics dashboard, and ArcisGPT assistant. The company’s representatives will also discuss upcoming AI models, API integrations, and enterprise deployment options during the exhibition.

Mee Adiance and ArcisAI Team @ IFSEC India 2025

Dates: December 11–13, 2025

Venue: Bharat Mandapam (Pragati Maidan), New Delhi

Hall No.: 4

Booth No.: i-10

About ArcisAI

ArcisAI is India’s most advanced AI CCTV brand, offering a unified ecosystem for intelligent surveillance, cloud analytics, and automated reporting. Its proprietary technologies — Edge AI, Cloud AI, and ArcisGPT — enable real-time decision-making and secure, compliant video management for enterprises, cities, and institutions.

As the flagship brand of [Adiance Technologies](#), ArcisAI combines decades of manufacturing expertise with innovative AI research to deliver reliable, scalable, and future-ready security solutions.
