

Digicode Achieves ISO 27701, Signaling Commitment to Secure Digital Innovation

Plano, Texas Oct 16, 2025 ([IssueWire.com](https://www.issuewire.com)) - Digicode, a U.S.-based technology and software development company, announced today that it has achieved ISO/IEC 27701:2019 certification. This globally recognized standard establishes best practices for Privacy Information Management Systems (PIMS) and underscores Digicode's commitment to data privacy, cybersecurity, and enterprise information governance.

ISO 27701 builds upon the widely adopted ISO 27001 standard, offering organizations a structured approach to managing Personally Identifiable Information (PII) and ensuring compliance with global data protection regulations such as GDPR and CCPA.

"Our clients operate in industries where privacy and data protection are critical," said Elkhan Shabanov, CEO, Americas. "Achieving ISO 27701 certification validates that our systems, engineering practices, and data handling processes meet the highest international standards. It signals Digicode's commitment to responsible innovation and secure digital transformation."

An independent audit rigorously assessed Digicode's data management controls, privacy risk mitigation measures, and overall security operations. With ISO 27701 certification, Digicode strengthens its ability to deliver secure, compliant software solutions across highly regulated industries such as FinTech, Healthcare, and e-commerce, where safeguarding sensitive data is essential.

This certification also complements Digicode's ISO 27001 accreditation, creating a comprehensive information security ecosystem aligned with global best practices. By achieving ISO 27701, Digicode continues to advance its mission of helping organizations innovate while maintaining the highest standards of data security and compliance.
