connectivity define global trade, Hans Infomatic Pvt. Ltd. introduces WiseCCS, a next-generation [Cargo Community System \(CCS\)](#) built to simplify and automate air cargo operations. WiseCCS serves as a central digital hub, integrating airlines, freight forwarders, customs brokers, ground handlers, and terminal operators into a unified communication framework. By connecting all stakeholders, the platform ensures real-time cargo visibility, faster document exchange, and seamless regulatory compliance. The software provides end-to-end process automation, from cargo acceptance to customs clearance, reducing manual errors by up to **70%** and improving operational turnaround by **40%**. Its cloud-based architecture ensures data security, scalability, and accessibility for users anywhere in the world.

Speaking on the launch, the company spokesperson said,

“WiseCCS is more than just software it’s an ecosystem that empowers every logistics stakeholder to collaborate efficiently. Our vision is to create a globally connected cargo environment that enhances India’s standing in international trade.”

Hans Infomatic has already deployed WiseCCS for several major clients, including Air France, Central Warehousing Corporation, and China Airlines, marking significant milestones in digital cargo transformation. With this breakthrough, Hans Infomatic strengthens its position as a pioneer in logistics technology, driving the industry toward smarter, greener, and more efficient cargo operations.
