

Hrishtune - Brings Together Storytelling, Animation, and Music in a Unique Creative Process

An Indian animation director and musical artist designs his songs through the lens of a filmmaker.

Mumbai, Maharashtra Oct 27, 2025 ([Issuewire.com](https://www.issuewire.com)) - Hrishtune, whose birth name is Hrishikesh Jadhav, is an Indian animation director, film director, and musical artist recognized for blending cinematic storytelling with music creation. His process begins not with melody or rhythm, but with a **fully written script**. For him, a song is an **extension of a narrative**, where every second, frame, lyric, and

emotion are interconnected to serve the story's intent.

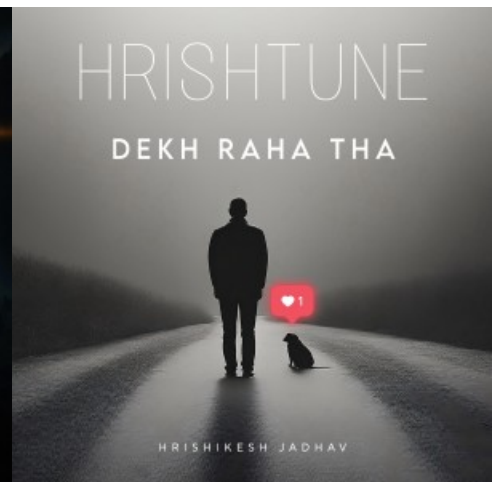

With a background rooted in both **animation direction and film direction**, Hrishtune approaches each 3:00–3:30 minute song as a **self-contained short film**. The visual pacing and emotional tone of the script determine the flow of the lyrics, which later shape the musical composition and sound design. His songs are written and composed the way a film is edited — with attention to continuity, timing, and rhythm.

“In animation, there are no retakes,” says Hrishtune. “If something goes wrong in a shot, the entire sequence must be re-animated. That’s why I treat every frame, every second, and every camera movement with precision — both in visuals and in sound.”

His body of work explores **themes of love, nostalgia, solitude, and spiritual reflection**, often focusing on human emotions expressed through time and imagery. Each project reflects a **meticulous process where visuals and sound evolve side by side**, creating a bridge between storytelling and music. Through this approach, Hrishtune continues to develop a body of work that connects cinematic depth with musical emotion — frame by frame, and note by note.

Hrishtune continues to work on independent animation and music projects, integrating storytelling, design, and composition into cohesive audiovisual experiences.
