

Hyperbots Inc. Selected for 2025 AWS Generative AI Accelerator

AWS GENERATIVE AI ACCELERATOR **2025 GLOBAL COHORT**

New York City, New York Oct 11, 2025 ([Issuewire.com](https://www.issuewire.com)) - Hyperbots Inc., a leading MoE Agentic AI platform for Finance & Accounting, pre-trained on 30 million finance documents and delivering 99.8%

accuracy in reading & understanding financial data from documents, today announced its selection for the third cohort of the AWS Generative AI Accelerator. Launched by Amazon Web Services, Inc. (AWS), the program identifies top startups leveraging AI to solve complex enterprise challenges and provides AWS credits, mentorship, and learning resources to help them scale globally.

Hyperbots is an advanced proprietary AI platform built with state-of-the-art components and models that power intelligent automation across financial and accounting workflows. Its architecture integrates a finance document Mixture-of-Experts (MoE) LLM, Vision-Language and Layout models, forecasting engines, mathematical reasoning modules, financial data classifiers, recommender systems, and a secure data redaction layer — all unified through a no-code business configuration platform. The Hyperbots team brings together innovators holding over **50 patents**, driving cutting-edge advancements in AI, finance automation, and enterprise software engineering.

Hyperbots transforms finance and accounting operations through its suite of **AI Co-Pilots** built on its proprietary AI platform. These Co-Pilots automate key processes such as **invoice processing, accruals, vendor management, procurement, payments, tax verification, cash reconciliation, collections, forecasting, and reporting.**

Since its launch, Hyperbots' platform has delivered measurable impact for clients across industries; some of their recent transformations include a NASDAQ-listed healthcare provider, a global marketing services corporation, a semiconductor robotics company, and an EV infrastructure provider. Customers have seen productivity gains up to 80%.

“Our vision at Hyperbots is to **redefine how finance and accounting teams operate in the 21st century** by leveraging the power of Agentic AI,” said **Rajeev Pathak, Co-founder and CEO of Hyperbots Inc.** “We’re transforming what’s possible in enterprise finance by empowering teams to achieve **unprecedented levels of automation, accuracy, and agility.**”

All 40 startups in the cohort will showcase their solutions to investors, customers, partners, and AWS leaders at AWS re:Invent 2025 in Las Vegas this December.

“Whether it’s in finance, biotech, creative studios, or industrial applications, the pace of generative AI innovation is extraordinary,” said Sherry Karamdashti, General Manager & Head of Startups, North America, AWS. “This year’s cohort reinforces our mission to help that innovation move faster and deliver real-world impact for customers in every industry.”

About Hyperbots Inc.

Hyperbots Inc. transforms Finance & Accounting operations using proprietary AI agents that autonomously read, reconcile, validate, and post financial data across complex workflows. Its specialized AI Co-Pilots operate on a finance-specific foundational architecture delivering intelligence in language, vision, reasoning, interpretation, recommendation, prediction, redaction, and exception handling. It has raised \$9 million in venture funding in 2024-25.

Hyperbots integrates seamlessly with major ERPs and upholds ISO 27001, SOC 1 Type 2, and SOC 2 Type 2 certifications.
