

Imagen Network Launches Modular Personalization Hubs for Creators

New personalization hubs give creators more adaptive tools to engage communities in decentralized ecosystems.

Seattle, Washington Oct 2, 2025 ([Issuewire.com](https://www.issuewire.com)) - [Imagen Network](#) (IMAGE), a decentralized AI-powered social platform, announced the launch of modular personalization hubs designed to enhance creator engagement and community growth. These hubs serve as adaptive environments where creators can customize audience experiences while retaining ownership and transparency.

The hubs allow creators to design personalized feeds, manage interaction logic, and apply AI-driven tools that adjust to real-time community activity. By offering flexibility and modularity, Imagen empowers creators to build stronger connections with their audiences without the constraints of centralized systems.

This launch reinforces Imagen Network's mission to combine decentralized infrastructure with advanced AI technologies. By introducing personalization hubs, the platform is broadening opportunities for creators while supporting the evolution of fair and scalable creator economies in Web3.

About Imagen Network

Imagen Network leverages decentralized infrastructure and advanced AI technologies to enhance engagement, personalization, and community building within Web3. The platform is designed to empower creators and users through transparent, adaptive, and interoperable digital ecosystems.
