

Konverge AI Partners with NextWave to Set Up its Global Capability Center (GCC) in India

San Diego, California Oct 16, 2025 ([Issuewire.com](https://www.issuewire.com)) - Konverge AI, a leading decision science and AI company, is expanding its capabilities into the Global Capability Center (GCC) business segment. This marks a major milestone in Konverge AI's journey to help enterprises scale global operations through AI, automation, and data-driven excellence.

Konverge AI is partnering with **NextWave**, an award-winning digital consulting firm that helps global financial institutions transform their businesses through industry expertise, AI, and automation, to establish "NextWave Labs," its best-in-class GCC in India. Together, they'll empower enterprises to innovate faster and build cutting-edge, AI-enabled solutions.

Prateek Chandrayan, CEO of [Konverge AI](https://www.konvergeai.com), said, "GCCs are no longer just about cost efficiency, they're about capability, innovation, and speed. At Konverge AI, our focus is on helping enterprises build centers that embed AI-driven intelligence at every level, turning operations into engines of innovation and growth. And now, by partnering with NextWave, we're taking this vision global, creating AI-powered

capability centers that redefine how enterprises scale, innovate, and lead.”

The partnership unites Konverge AI’s enterprise AI expertise with NextWave’s global transformation experience across financial services and other industries, creating a scalable and intelligent framework for setting up a global innovation and AI hub.

Tony Clark, CEO of [NextWave](#), said, “We’ve always believed transformation should be fast, measurable, and real. Our collaboration with Konverge AI brings that to life through ‘NextWave Labs’, our innovation and AI hub, blending AI, innovation, and execution to build a smarter, future-ready model for financial and other global industries”

This initiative reinforces Konverge AI’s vision to go beyond traditional service delivery models and build AI-enabled GCCs that serve as innovation and intelligence hubs for global organizations. These innovation centers focus on enhancing agility, improving decision-making, and driving measurable business outcomes across functions.

Key Focus Areas of Konverge AI’s GCC Capabilities

- **AI-Enabled Operations:** Embedding intelligence, automation, and [Agentic AI](#) capabilities across global business functions.
- **Capability Center Design:** Structuring GCCs aligned with enterprise goals, digital roadmaps, and scalability needs.
- **Data & AI Centers of Excellence (CoEs):** Creating modular frameworks and accelerators for rapid AI adoption.
- **Governance & Security:** Establishing compliant, secure, and sustainable operating models.

Konverge AI’s expansion into the GCC ecosystem is built on its proven success with enterprise AI platforms, GenAI accelerators, and automation frameworks already deployed for clients across manufacturing, healthcare, construction, and BFSI sectors.
