

Nesaraq Launches AODM: Revolutionary AI Data Framework

West Bloomfield Township, Michigan Oct 16, 2025 ([IssueWire.com](https://www.issuewire.com)) - A developer from West Bloomfield, Michigan, today unveiled AODM (AI-Optimized Data Markup) at nesaraq.com, a revolutionary framework that transforms AI development by making training dramatically faster, cheaper, more energy-efficient, and far less GPU-intensive than traditional methods. Unlike conventional data pipelines that waste resources on manual preprocessing, AODM automates data structuring and cleaning at the source, slashing computational demands for large-scale AI models by 15-50%.

What sets AODM apart is its lightweight, web-native approach, embedding AI-ready markup directly into content to eliminate redundant processing steps that plague legacy workflows. With widespread adoption, AODM is projected to deliver 212.5-1,625 GWh in annual energy savings (enough to power 170,000-1.3 million U.S. homes for a year), require 20-40% fewer GPUs (22,500-562,500 globally) which reduces reliance on rare earth metals critical for GPU manufacturing, and saves the AI industry \$225M-\$2.25B in training costs yearly. This efficiency edge benefits AI companies seeking scalable solutions, while developers building apps, websites, and analytics tools gain faster API integration, 10-15% SEO traffic boosts, and 15-25% revenue from structured data features.

“AODM redefines AI data optimization by making preprocessing invisible for AI trainers and delivering clean, SEO-ready data for developers while cutting GPU dependency,” said Ryan Patrosso, Founder of Nesaraq. “It was built to solve real bottlenecks, delivering cleaner models, lower costs, and greener compute at unprecedented scale.”

Still in early development, Nesaraq seeks partners to accelerate rollout. Early benchmarks show AODM outperforms existing tools by automating 45-80% of AI project preprocessing timelines, while enabling non-AI developers to skip custom scrapers and gain instant structured feeds, positioning it as the gold standard for next-generation data markup.

Available now at nesaraq.com/aodm, AODM empowers AI companies and developers with unmatched efficiency.

About Nesaraq

Nesaraq, based in West Bloomfield, MI, pioneers accessible AI optimization tools worldwide. Visit nesaraq.com.
