

Panache Industries Strengthens Its Position as a Premier Supplier of Ferrous & Non-Ferrous Metals

Mumbai, Maharashtra Nov 3, 2025 ([IssueWire.com](https://www.issuewire.com)) - Panache Industries, a respected manufacturer-stockist & supplier based in Mumbai, is proud to reaffirm its commitment to delivering an extensive range of high-quality ferrous and non-ferrous metal products. With a legacy that dates back to its founding in 1981, the company has grown to become a full-spectrum industrial solutions provider, specialising in stainless steel, high-nickel alloys, titanium, copper-based metals and aluminium.

Comprehensive Product Portfolio

From round bars, flat bars, square bars, hex bars, sheets, plates, coils, wires, fasteners and capillary tubes, Panache Industries offers materials across a broad specification range. With alloys including Duplex 2205, Super-Duplex 2207, Inconel 600, Hastelloy, Monel, Titanium Grade 2 and various aluminium grades (1050, 2024, 6061, 7075, etc.), the company is equipped to serve demanding industrial, oil & gas, chemical, infrastructure, engineering and manufacturing sectors.

Quality & Manufacturing Excellence

Panache Industries emphasises quality assurance through rigorous procedures: raw-material test certificates, documented in-process inspections, material control systems and third-party audits. The company's in-house machining and precision-tooling capabilities enable customised production and fast turnaround, making it a reliable partner for both standard and special requirements.

Industry Reach & Client Trust

With more than 350 projects completed and 120+ work engagements, Panache Industries has demonstrated its ability to handle large-scale industrial demands. Its client-list spans major names in steel, petrochemical, oil & gas and infrastructure, evidencing broad industry trust.

Why Choose Panache Industries

- Decades of experience (established in 1981) ensure stability and reliability.
- Wide alloy coverage and product formats under one roof.
- High commitment to delivery schedules and quality fulfilment.
- Tailored support, including technical advice, project planning and global export readiness.
