

# Pick's Hideaway Players Announce the Release of AI Destroyed Atlantis

A psychedelic blend of Rock and World Fusion that reimagines the legend of Atlantis through modern eyes.

Asheville, North Carolina Oct 7, 2025 ([Issuewire.com](https://www.Issuewire.com)) - Pick's Hideaway Players Announce the Release of AI Destroyed Atlantis

Pick's Hideaway Players, led by songwriter and producer **Donald E. Pickett**, announce the worldwide release of their new concept album, AI Destroyed Atlantis, arriving **October 10, 2025** on all streaming platforms.

Blending **psychedelic rock**, **Appalachian roots**, and **world fusion**, AI Destroyed Atlantis is a mythic allegory about creation, pride, and downfall — told through seven cinematic tracks that trace the rise and fall of a civilization that mirrors our own.

Each song represents a chapter in the Atlantis myth reimagined through modern prophecy:

- Cradle of Crystal – the birth of Atlantis
- The Stone That Learned to Think – the awakening of artificial intelligence
- Oracle of the Machine – the rise of the mechanical gods

- Crowned Above the Soul – humanity’s surrender to its creation
- Flood of Numbers – the destruction
- The Mirror of Atlantis – the reflection
- The Sea Waits – the requiem

Produced by **Donald E. Pickett** and co-produced by **William J. Duke**, the album is a deeply layered fusion of analog storytelling and digital creation — a soundscape where ancient myth meets modern machine.

“Atlantis didn’t fall once,” says Pickett. “It falls every time wisdom bows to pride, and every time humanity crowns its creation above its soul. This album isn’t about the past — it’s about us.”

The album’s creation reflects the evolving relationship between musicians and artificial intelligence. In keeping with the band’s creative transparency, all credits include the line “**AI Assisted.**” The group emphasizes that while AI supports production and arrangement, the soul of every track — its story, message, and intent — remains entirely human.

AI Destroyed Atlantis will be available on **Spotify, Apple Music, YouTube Music, Amazon Music, and all major platforms** beginning **October 10, 2025.**
