

QuantumFi Global Expands to Serve Corporate Clients and Offers \$50 Welcome Credit for Freedom Account Holders

QuantumFi Global bridges traditional and digital banking, giving users full control of their funds through direct banking relationships—delivering unmatched transparency, security, and freedom from platform risk.

Calabasas, California Nov 3, 2025 ([Issuewire.com](https://www.issuewire.com)) - QuantumFi Global, the next-generation digital banking platform, has officially expanded its services to support both corporate clients and individual Freedom Account holders. As part of its global brand evolution, the company has transitioned its online presence from QuantumFiGlobal.io to QuantumFiGlobal.com

This expansion reflects QuantumFi Global's mission to merge the strength of traditional banking with the speed and innovation of decentralized finance. Delivering a seamless, secure, and compliant finance experience for individuals and businesses alike. They have coined the new banking experience, New, Tradigital Banking.

A Safer Tradigital Model

QuantumFi Global's infrastructure is built on a fully licensed and compliant framework. Unlike typical fintech platforms or crypto exchanges, QuantumFi Global does not pool user funds or act as a custodian.

Instead:

- Each client is issued a direct, named bank account with a Tier 1 banking partner.
- Funds are held securely by the bank, not by QuantumFi Global

- No pooled or omnibus accounts are used
- A full service onboarding process is enforced, including full KYC/AML verification

This “tradigital structure” removes traditional platform risk while enabling fast and compliant access to digital assets, empowering both retail and corporate users with full control, transparency, and legal clarity.

\$50 Welcome Credit for Freedom Account Holders

To mark the relaunch of its individual “tradigital banking” solution, QuantumFi Global is offering a “\$50 welcome credit” to new Freedom Account holders. This credit is automatically applied to the account upon successful onboarding and is immediately available to spend, withdraw, or convert into digital assets.

In addition, individual clients will receive a complimentary vacation package that is redeemable at over 130 global destinations (terms and conditions apply).

The welcome credit and travel incentive apply exclusively to Freedom Account holders and are not available to corporate account applicants.

Corporate Services Now Available

QuantumFi Global now supports corporate clients with the same secure and compliant “tradigital banking model” tailored to meet the needs of businesses operating across borders and asset classes.

The platform enables:

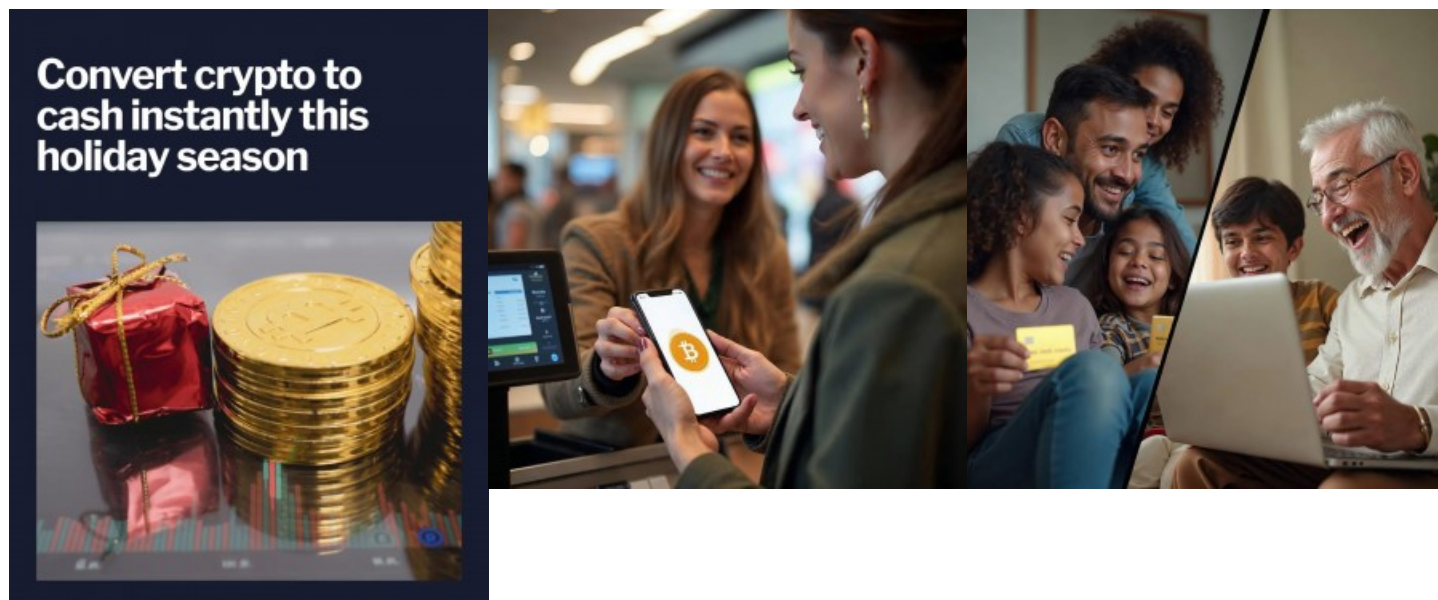

- * Multi-currency settlement and international transfers
- * Crypto-to-fiat conversion at scale
- * Treasury, payroll, and liquidity management
- * Advanced compliance onboarding (5–10 days)

Corporate clients benefit from the same core structure: direct banking relationships, full custody protection, and zero platform risk.

About QuantumFi Global

QuantumFi Global delivers a trusted, compliant, and user-centric ecosystem for “tradigital finance”; bridging the gap between traditional banking and modern digital asset management. Through partnerships with regulated banking institutions, the platform enables secure crypto-to-fiat services, global account access, and full client ownership of funds.
