

Royoso x SkyUX: Where Technology Meets Compassion

Using AI Intelligence and Financial Kindness to Shape the Future of the World

Arkadelphia, Arkansas Oct 13, 2025 ([Issuewire.com](https://www.issuewire.com)) - In this age of uncertainty, disasters, poverty, loneliness, and inequality continue to spread across the globe. Royoso International Investment Group and SkyUX Web3 Exchange Inc. have chosen a new path to change the world — driven by artificial intelligence, blockchain, and financial responsibility, they aim to bring humanity back to wealth and warmth back to technology. They believe that true finance is not merely the extension of profit, but the embodiment of responsibility.

1. When disaster strikes, they are the first to act

Whether it's an earthquake in Chile, a hurricane in the Caribbean, or floods in Asia, Royoso and SkyUX are always among the first to arrive. After the 2025 Valparaíso earthquake in Chile, Royoso, through its Humanitarian Relief Fund (Royoso Emergency Relief Fund), joined forces with SkyUX's Blockchain Donation Tracking System, delivering over 15 tons of relief supplies within 48 hours. Every tent, every bag of medicine, every dollar donated — all can be traced and verified. This is not just speed — it's trust.

"Technology makes the delivery of compassion more precise and transparent." — SkyUX Technical Director

2. AI Trading for the People: Returning Wealth to the Many

The mission of Royoso and SkyUX extends far beyond trading. Their AI Copy Trading System is quietly transforming the lives of millions. Once, only professionals could understand complex financial models. Today, anyone — whether a farmer, teacher, driver, or young entrepreneur — can use AI-driven trading models on SkyUX's platform to achieve low-risk, stable returns on their assets. Royoso's AI research team, combined with SkyUX's quantitative engine, analyzes market trends daily, automates risk control, and allocates positions intelligently. Users simply "follow AI" to achieve sustainable wealth growth.

As of Q3 2025:

- Over 1.2 million users are using the AI Copy Trading System
- Average monthly returns of 3.8%–6.5%
- Users from 40+ countries have improved their livelihoods through it

"We don't aim to make a few people rich — we aim to help many live better, more secure lives." — Royoso Global CEO

3. From AI Profit to AI Philanthropy: Technology That Gives Back

Royoso and SkyUX automatically allocate part of their AI trading profits to the Hope & Humanity Fund. This system automatically donates monthly profits to:

- Disaster reconstruction
- Educational assistance
- Elderly care programs
- Women's entrepreneurship support

When disasters occur, SkyUX's AI Rapid Response Mechanism activates within three hours, transferring emergency funds directly into local digital wallets. In the Philippines, Haiti, and Peru, residents received global aid through digital finance — for the first time in their lives.

“AI doesn’t replace humanity — it helps compassion work more efficiently.” — Chairperson, Royoso Humanitarian Foundation

4. Education and Care: Digital Hope for Children and the Elderly

In the valleys of Peru and communities across Colombia and Mexico, the Warm Future Foundation by Royoso × SkyUX is bringing tangible change.

- Scholarships and AI learning devices for 3,000+ children
- Digital wallets and financial training for 4,000+ elderly citizens
- 10 financial education centers established across different countries

As one elderly man in Brazil shared: “I used a digital wallet to receive my pension — it feels like I’ve finally entered the new era.”

5. Poverty Alleviation and Empowerment: AI as an Engine for Change

The AI Empowerment Chain launched by Royoso × SkyUX analyzes economic data to provide intelligent financial advice to low-income users. In Cambodia, Kenya, and Nicaragua, they offer AI-based microloans and risk prediction tools to small farmers and women entrepreneurs, helping them purchase equipment, expand production, and escape poverty.

As of 2025:

- 280,000 people have received AI-supported unsecured loans
- 50,000 women entrepreneurs have achieved stable income
- 12 rural communities have realized financial self-sustainability

“When AI becomes a tool for poverty reduction, technology is no longer cold.” — SkyUX Director of Social Impact

6. From Capital to Compassion: The Return of Financial Soul

The financial philosophy of Royoso and SkyUX is simple: “Capital should serve life — not rule it.” They allocate 2.5% of annual profits to humanitarian and education projects, automatically distributed by AI-driven models to ensure fairness and impact. SkyUX’s blockchain guarantees that every transaction is traceable and verifiable. Their model was recognized by the United Nations Sustainable Development Programme (UNSDP) as a “Global Case of Poverty Reduction and Economic Empowerment (SDG Action Case 2025).”

7. Looking Toward 2030: Fintech for Humanity

Over the next five years, Royoso × SkyUX will fully launch the “Fintech for Humanity” Initiative, with key goals to:

- Provide digital financial identities for 10 million people
- Promote AI-driven inclusive finance and clean energy in 20 countries
- Deploy AI education systems in 50 schools
- Establish a global blockchain standard for philanthropic transparency

They are proving that technology is not just a symbol of efficiency — it is the extension of kindness. The story of Royoso × SkyUX is a revolution that fuses technology and compassion. They create wealth through AI — and restore balance through empathy. They make every transaction a bridge of trust. In the digital era, they are redefining what the future of finance means, and what true wealth stands for.

“When intelligence has conscience, and when capital learns to share, the world becomes a better place — built on trust and love.” — Joint Statement · Royoso × SkyUX
