

SafeEdges India Partners with South Korea's LeadPoint to Strengthen Blockchain and Cybersecurity Collaboration

The strategic partnership, signed during GITEX Global 2025 in Dubai, aims to enhance permissioned blockchain security and promote India–Korea cooperation in advanced cybersecurity and blockchain innovation.

Panna, Madhya Pradesh Oct 28, 2025 ([Issuewire.com](https://www.issuewire.com)) - SafeEdges India Signs Strategic Partnership with South Korea's LeadPoint to Strengthen Blockchain and Cybersecurity Collaboration

SafeEdges, an Indian cybersecurity and blockchain security company, has signed a strategic partnership agreement with LeadPoint, a leading South Korean technology firm specializing in blockchain innovation and product development. The agreement was formalized during GITEX Global 2025, the world's largest technology summit, held in Dubai.

LeadPoint, renowned for its advancements in blockchain technology, recently launched a government-recognized permissioned blockchain network in South Korea. This innovation has been officially endorsed by South Korean government authorities for its contribution to digital transformation and

secure data infrastructure.

Through this partnership, SafeEdges India will collaborate with LeadPoint Korea to enhance the security architecture of permissioned blockchain systems and develop long-term frameworks for cybersecurity resilience. The partnership aims to combine India's cybersecurity expertise with South Korea's technological innovation, creating robust and secure digital infrastructure solutions for enterprises and governments.

*"This partnership marks a major milestone for both countries in strengthening cybersecurity cooperation," said **Mr. Piyush Shukla**, Founder of SafeEdges, who represented the company at the **MoU signing ceremony** at GITEX Dubai. "Together with LeadPoint, we aim to build secure, scalable, and future-ready blockchain ecosystems that meet the highest global security standards."*

Headquartered in Panna, Madhya Pradesh, India, SafeEdges has emerged as a high-level cybersecurity firm offering advanced services across blockchain security, smart contract audits, and cyber threat intelligence. With a team of skilled security researchers and auditors, the company has worked on securing multi-billion-dollar blockchain ecosystems globally.

This partnership represents a significant step in India-Korea technological cooperation, enabling both companies to leverage their strengths to advance blockchain security, data integrity, and digital infrastructure resilience across international markets.
