

Secure Your Home with Taichuan: Video Intercom Systems on Display at SECUTECH VIETNAM

Zhuhai, Guangdong Oct 23, 2025 ([Issuewire.com](https://www.issuewire.com)) - The latest advancements in home security will be a focal point at SECUTECH VIETNAM, the leading security, safety, and fire protection exhibition in Hanoi. Taichuan, a distinguished pioneer in smart security technology, is proud to announce its participation, where it will showcase its latest **[China Video Intercom system for home security](#)**. This cutting-edge system is designed to provide homeowners with an all-encompassing solution for property access and protection. By integrating high-definition video, two-way audio communication, and remote access control into a single, user-friendly platform, Taichuan's products offer unparalleled peace of mind and convenience, making them an essential component of any modern home security setup.

The Evolving Landscape of Residential Security

The residential security market is undergoing a profound transformation, moving beyond traditional alarms to sophisticated, interconnected systems. The demand for advanced **[video intercom systems](#)** is accelerating globally, driven by homeowners' desire for greater control, real-time monitoring, and seamless integration with their connected lifestyles. Key trends shaping this industry include the rise of AI-powered features for facial recognition, motion detection, and package delivery alerts, the proliferation of cloud-based platforms for remote management and data storage, and the increasing adoption of IoT devices that create a holistic **[Smart Home](#)** ecosystem. Modern consumers are not only concerned about security but also about convenience and aesthetic appeal, demanding products that are not only functional but also blend seamlessly with their home décor.

Modern homeowners are looking for more than just a doorbell; they want a comprehensive security and communication hub. The ability to see who is at the door, communicate with visitors or delivery personnel, and grant access from anywhere in the world has become a standard expectation. This shift is also fueled by the growth of urban populations and the need for more secure, convenient, and efficient living spaces in apartment buildings and gated communities. The rise of e-commerce has also created a new security challenge: managing deliveries. Smart intercom systems with features like one-time passcodes for couriers or secure package compartments are becoming increasingly popular. As a company that has been a trailblazer since its inception in 1999, Taichuan has an unwavering dedication to innovation. Its journey is marked by a forthcoming initial public offering (IPO), a significant milestone that underscores its ambitions to capitalize on these trends and lead the market with cutting-edge technology that addresses these new challenges head-on.

SECUTECH VIETNAM: A Strategic Hub for Southeast Asia

SECUTECH VIETNAM is recognized as the leading security and fire safety trade show in the country, attracting thousands of industry professionals from across Southeast Asia. The exhibition provides a vital platform for showcasing the latest technologies and forging key business relationships. Vietnam's rapidly growing economy, fast-paced urban development, and rising middle class have created a strong demand for advanced security solutions for both residential and commercial sectors. The government's focus on smart city initiatives further emphasizes the need for reliable and scalable security infrastructure. This market is not only a major consumer of technology but also a key manufacturing hub, making SECUTECH a critical event for international companies seeking to establish a foothold in the region.

Participating in SECUTECH VIETNAM allows Taichuan to directly engage with key stakeholders, including distributors, system integrators, and property developers, and demonstrate how its products can address the specific security challenges and operational requirements of the Vietnamese market. The event is a strategic move to not only expand Taichuan's market share in this high-potential region but also to gather valuable insights into local market dynamics and consumer preferences. By establishing a strong presence at this exhibition, Taichuan aims to solidify its position as a trusted and innovative provider of smart security solutions in Vietnam and beyond. The company will be actively seeking local partners who can benefit from its robust OEM and ODM capabilities, offering them the chance to market high-quality, reliable products under their own brand.

Taichuan's Core Strengths and Client Success

Taichuan's reputation is built on an unwavering dedication to innovation and a deep understanding of the smart security sector. Our core strength lies in our robust R&D capabilities, which enable us to develop comprehensive security solutions that are both technologically advanced and user-friendly. Our product lineup includes a variety of solutions, from IP video intercoms and smart doorbells to integrated access control systems, all designed to meet the demanding requirements of residential and commercial properties. We pride ourselves on our meticulous quality control processes and our commitment to creating products that are not just smart, but truly reliable.

Our products are widely applied across various sectors, including residential communities, single-family homes, and commercial buildings. A key client success story involves a major real estate developer in a fast-growing Southeast Asian city who chose Taichuan's **China video intercom system for home security** for a new series of luxury villas. The developer was particularly impressed with the system's intuitive mobile app, which allowed homeowners to receive real-time video calls from their front door, unlock gates remotely, and monitor their property from anywhere. This integration not only enhanced the

security of the properties but also provided a key selling point, highlighting the value of a truly smart and secure living experience. The project's success led to a long-term partnership with the developer for all future projects. Another notable case is a commercial building in Vietnam where our multi-tenant video intercom system streamlined visitor management, improved security at the main entrance, and provided a seamless communication link between tenants and the management office, leading to a significant increase in operational efficiency.

We are committed to empowering our partners through our OEM and ODM services, allowing them to bring their own branded solutions to market with our proven technology. Our expertise in tailoring products to specific regional requirements, from language support to local protocol integration, makes us an ideal partner for businesses looking to expand their product portfolio. To learn more about our products and how we can support your business, please visit our official website at <https://www.taichuansmart.com/>. We invite all attendees of SECUTECH VIETNAM to visit our booth and see how our security technology is redefining safety and convenience for the modern home.
