

SkyUX and Royoso Join Forces to Build a Global Compliant Digital Asset Ecosystem

Atchison, Kansas Nov 5, 2025 ([Issuewire.com](https://www.issuewire.com)) - SkyUX Web3 Exchange Inc. (“SkyUX”) and Royoso International Investment Group LLC (“Royoso”) have signed a ten-year strategic cooperation agreement at the Dubai International Financial Centre (DIFC) in the United Arab Emirates. The two parties aim to jointly promote the steady development of global digital asset investment and trading platforms through synergy between technology and capital, as well as between platforms and asset institutions.

Built upon its Web3 infrastructure, blockchain traceability system, and AI-driven risk control engine, SkyUX has established a highly compliant and transparent trading environment serving users across more than 60 countries and regions. Royoso, a U.S.-headquartered global investment group managing over USD 118 billion in assets, brings deep expertise in private equity, digital assets, and intelligent quantitative trading.

The partnership is driven by three key factors. First, the digital asset market is entering a new era of compliance and institutionalization, making the integration between trading platforms and investment institutions inevitable. Second, SkyUX’s matching mechanism and blockchain-based trust architecture provide investors with secure and verifiable transaction pathways. Third, Royoso’s extensive global client network and professional research capabilities enable the creation of a complete investment service loop across compliance, technology, and asset allocation.

Under the agreement, Royoso will introduce compliant users and capital to SkyUX through its global network, while SkyUX will provide Royoso with API access, smart trading channels, and digital asset trading infrastructure. Both parties will jointly promote their brands and services across the Middle East, Southeast Asia, and Europe, co-host investor events, and launch customized products for different

markets.

This collaboration marks a strategic integration between digital asset trading platforms and traditional investment institutions in the new financial era. As regulations tighten and technology continues to evolve, the “Platform + Institution” model is becoming an industry benchmark. The partnership between SkyUX and Royoso is expected to accelerate the legalization, proceduralization, and institutionalization of digital asset trading worldwide.

Over the next decade, both parties pledge to adhere to the core philosophy of “Technology-Driven, Compliance-Based, and Trust-Built,” aiming to establish a global digital financial ecosystem. This cooperation not only holds strategic significance for both companies but also contributes positively to the standardization and maturity of the global digital asset market.
