

Taichuan Showcases China's Leading Smart Intercom Systems for Apartment Buildings at Securika Moscow

Zhuhai, Guangdong Oct 23, 2025 ([Issuewire.com](https://www.issuewire.com)) - The future of residential security is a key focus at Securika Moscow, Russia's largest international exhibition for security and fire safety equipment. Taichuan, a distinguished leader in [Smart Intercom](#) solutions, is excited to announce its participation, where it will present its latest [China high-quality smart intercom systems for apartment buildings](#). These systems are engineered to provide a comprehensive security solution, integrating advanced features like video communication, remote access control, and seamless integration with other smart building technologies. By offering a robust, all-in-one platform, Taichuan aims to redefine the standards of security and convenience for property managers, developers, and residents alike. The company's solutions are designed to meet the unique needs of large-scale residential projects, ensuring a secure and connected living environment.

The Evolving Landscape of Residential Security

The smart intercom market for apartment buildings is experiencing a period of significant innovation, driven by the increasing demand for enhanced security, convenience, and connectivity. The traditional analog intercom is rapidly being replaced by intelligent, IP-based systems that offer a multitude of benefits. Key trends shaping this industry include the integration of artificial intelligence (AI) for facial

recognition and visitor screening, the adoption of cloud-based management platforms for real-time monitoring and remote control, and the growing demand for mobile app integration that allows residents to manage access from anywhere.

Modern urban living requires a more sophisticated approach to security. Property developers and building managers are seeking solutions that not only deter unauthorized entry but also improve the resident experience and streamline property management. This includes the ability to grant virtual keys, manage deliveries, and receive alerts directly on their smartphones. The shift towards IoT-enabled devices is creating a cohesive ecosystem where security, automation, and communication are interconnected. This presents a vast opportunity for forward-thinking companies like Taichuan to lead the charge in defining the future of smart, secure living. Since its inception in 1999, Taichuan has been a trailblazer in the smart intercom sector, and its forthcoming initial public offering (IPO) underscores its ambitions for further growth and expansion.

Securika Moscow: A Key to the Russian Market

As Russia's largest and most prominent security exhibition, Securika Moscow provides an essential platform for industry professionals to discover the latest technologies and forge key partnerships. The event attracts a diverse audience, including distributors, system integrators, government officials, and security experts from across Russia and Eastern Europe. With a focus on modernizing infrastructure and a strong emphasis on security in both private and public sectors, the Russian market is ripe for advanced smart security solutions.

Participating in Securika Moscow allows Taichuan to directly engage with key stakeholders and demonstrate how its products can address the specific security challenges and operational requirements of the Russian market. It is an opportunity to showcase the company's commitment to quality and innovation, building trust and establishing a strong presence in this critical region. Taichuan's participation is a strategic move to not only expand its market reach but also to understand local market dynamics and foster long-term relationships with Russian partners. The exhibition will serve as a launchpad for Taichuan to introduce its tailored solutions to a market with immense potential for smart security technology adoption.

Taichuan's Core Strengths and Client Success

Taichuan's reputation is built on an unwavering dedication to innovation and a deep understanding of the smart intercom sector. Our core strength lies in our comprehensive R&D capabilities, which allow us to develop robust and feature-rich products. We specialize in providing a wide array of solutions, including IP video intercoms, smart [Doorbells](#), and advanced access control systems, all designed to meet the demanding requirements of apartment buildings.

Our systems are widely applied in large-scale residential and commercial projects. For apartment buildings, our solutions provide a seamless and secure experience, offering residents the ability to see and communicate with visitors, unlock doors remotely via a mobile app, and receive alerts for deliveries and guests. In a notable client success story, a major real estate developer in a fast-growing Eastern European capital implemented Taichuan's smart intercom system across a series of new high-rise residential towers. This move not only enhanced the security of the properties but also provided a key selling point for new units, thanks to the system's user-friendly interface and advanced features. The developer reported a significant increase in tenant satisfaction and a streamlined management process.

As a trusted OEM partner, we are committed to providing customized solutions that enable our clients to

build their own brand and meet the specific needs of their local markets. To learn more about our products and how we can support your business, please visit our official website at <https://www.taichuansmart.com/>. We look forward to welcoming visitors to our booth at Securika Moscow to experience the future of residential security.
