Thordata: Products and Pricing

[Residential Proxies](#) — Starts from \$1.80/GB (Traffic-based Billing)

Thordata's residential proxy network covers 190+ countries with over 60 million authentic IPs. With precise targeting by country, city, state, zip code, or coordinates, automated tasks and crawlers can access target sites as real users, ensuring stable localized data collection and minimizing ban risks.

High-Bandwidth Proxies— Billed by Bandwidth/Server

Designed for video scraping and large-scale scraping tasks, high-bandwidth proxies offer high

concurrency, low latency, and stable transmission, reducing interruption risks and supporting customizable server and bandwidth resources.

Datacenter Proxies — Starts from \$0.75/IP (IP-based Billing)

A global network of advanced datacenter IPs, ideal for data collection on straightforward target sites. This is a fast and cost-effective option for companies seeking consistent request origins throughout their campaigns.

Static ISP Proxies — Starts from \$0.75/IP (IP-based Billing)

ISP proxies, also known as static residential proxies, are sourced from Internet Service Providers (ISPs). Thordata offers static ISP proxies from 110+ regions worldwide, perfect for traffic-intensive scraping tasks or maintaining consistent identities, such as ad verification, app testing, and multi-account management.

Mobile Proxies — Starts from \$2.20/GB (Traffic-based Billing)

Mobile proxies provide the highest level of anonymity, making requests appear as if they originate from real mobile devices, nearly undetectable by websites. Thordata's network includes over 600,000 mobile proxy IPs across 140 countries, minimizing CAPTCHAs and IP bans during data collection.

Web Scraper API — Starts from \$0.59/1K Results

Thordata's Web Scraper API is a tailored solution for specific business websites, transforming complex web data into user-friendly API calls and formats for seamless integration and rapid deployment.

Universal Scraping API — Starts from \$1.00/1K Responses

Thordata's Universal Scraping API combines real user fingerprints with residential-grade IPs, featuring automatic website unlocking, real-time block detection, CAPTCHA recognition, intelligent IP rotation, and auto-retry to ensure stable and efficient access to target sites.

SERP API — Starts from \$0.80/1K Responses

Thordata's SERP API is an efficient data collection tool that automatically scrapes real user search results from major search engines like Google, Bing, and DuckDuckGo. It supports highly customizable search parameters and delivers data in JSON and HTML formats.

Datasets — Free Trial Available

No need to scrape from scratch. Thordata offers pre-built datasets from 120+ websites, including LinkedIn, YouTube, TikTok, Amazon, and Walmart, ready for immediate use.

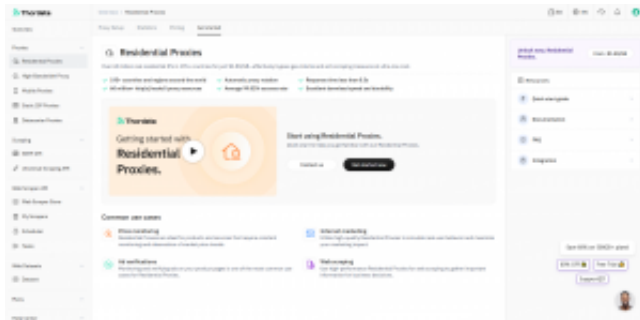

Customer Support Options

For assistance with [Thordata proxies](#), contact the support team via email at support@thordata.com, use the 24/7 live chat on the website, or refer to the online [support documentation](#). Thordata provides comprehensive support for both individual and enterprise clients. For customized enterprise solutions or professional services, reach out for a detailed quote.

Experience Thordata Firsthand

[Signing up with Thordata](#) is quick and easy. Users can register with an email and password or log in directly via Google or GitHub. Upon registration, you'll access an intuitive dashboard where the left menu provides easy navigation to all features, and the main panel displays the core dashboard. Tools and functionalities are clearly organized for seamless user experience.
