

Tradsark Unveils Next-Generation Agricultural Film Solutions to Support Global Sustainable Farming

Innovative greenhouse, mulch, and reflective films designed to increase crop yield, save energy, and protect the environment.

Weifang, Shandong Oct 11, 2025 ([Issuewire.com](https://www.Issuewire.com)) - [Tradsark New Materials \(Weifang\) Co., Ltd.](#), a professional manufacturer of high-performance packaging and agricultural films, proudly announces the launch of its advanced Agricultural Film Series, featuring [Polyethylene Mulch Film](#), **Greenhouse Covering Film**, and [Reflective Mylar Film](#). These innovative films are designed to help farmers worldwide improve productivity while promoting sustainable agriculture.

The new product line integrates **cutting-edge metallization and co-extrusion technology**, delivering excellent durability, light reflection, and temperature control. Tradsark's agricultural films are used across vegetable cultivation, greenhouse systems, fruit production, and energy-efficient agricultural operations.

"Our mission is to make agriculture more efficient and sustainable," said a spokesperson for Tradsark. "Through technology-driven materials, we help farmers optimize light, moisture, and energy use while reducing environmental impact."

Tradsark's films provide several key advantages:

- **Enhanced crop growth:** Stable soil temperature and moisture retention.
- **High reflectivity:** Boosts photosynthesis for better yields.
- **Weather resistance:** Withstands UV, wind, and heat for long-term field use.
- **Eco-friendly design:** Supports global sustainable farming practices.

All Tradsark products are manufactured under **ISO9001, ISO14001, and CE certifications**, ensuring consistent quality, safety, and environmental compliance. The company's Reflective Mylar Film has become a preferred choice for modern agricultural projects aiming to improve energy efficiency and productivity.

With growing exports to **Asia, Europe, and South America**, Tradsark continues to expand its presence in the global agricultural film market, providing reliable materials for farmers, distributors, and agritech enterprises worldwide.

About Tradsark New Materials (Weifang) Co., Ltd.

Tradsark New Materials (Weifang) Co., Ltd. is a leading Chinese manufacturer specializing in [BOPP](#), [CPP](#), [PET](#), and **metallized films** for food packaging, agriculture, and industrial applications.

Located in **No. 7830, Dongfeng East Road, Kuiwen District, Weifang, Shandong, China**, Tradsark operates with a mission to deliver **high-quality, innovative, and eco-friendly film materials**.

The company's products are widely recognized for their durability, optical clarity, and sustainability across multiple global markets.
