

UBIZO Launches Global AI Digital Workforce Initiative

Barrow, Alaska Oct 30, 2025 ([Issuewire.com](https://www.issuewire.com)) - In 2025, the rapid evolution of artificial intelligence is reshaping global industries, with many traditional jobs facing structural transformation. Responding to this global shift, UBIZO Digital Human Intelligence Co., Ltd. officially announces its AI Digital Workforce Initiative, aiming to empower every individual to generate income and new career opportunities through AI technology.

After three years of development and optimization, UBIZO has built one of the world's leading open AI ecosystems. Its core capabilities revolve around AI digital humans — integrating virtual avatar creation, automated content generation, intelligent distribution, and a fully transparent revenue-sharing system.

With UBIZO, users do not need any technical background. Anyone can create and operate AI digital humans for scenarios such as livestream e-commerce, brand advertising, and short-form content creation, earning continuous revenue based on performance and engagement.

A UBIZO spokesperson stated:

“The true value of AI should never be exclusive to elites. We want intelligent technology to empower everyone who strives for a better life.”

UBIZO will also launch global education partnerships and establish the UBIZO Digital Human Academy, offering skills training and income enablement programs across different regions — making AI a new engine for global productivity growth.

Looking ahead, UBIZO will continue expanding its ecosystem through collaborations with brands, e-commerce companies, educational organizations, and public welfare initiatives — ensuring that AI technology supports more industries and helps humanity transition into a new era of digital intelligence economy.
