

Victory Garden Systems Launches Solar-Powered, Self-Watering Planters on Kickstarter

Innovative cedar-framed planters bring effortless, sustainable gardening to homes, patios, and balconies worldwide.

Scranton, Pennsylvania Jan 2, 2026 (IssueWire.com) - **Grow Smarter, Live Greener with Victory Garden Systems**

Victory Garden Systems is proud to announce the launch of its Kickstarter campaign, introducing a line of solar-powered, self-watering planters designed for modern, sustainable gardening. Combining eco-friendly technology, premium cedar craftsmanship, and innovative hydroponic design, these planters make growing fresh food effortless for homes, patios, rooftops, and urban spaces.

Unlike traditional plastic planters, Victory Garden Systems offers durable, heirloom-quality product built to last season after season. Each system features rot-resistant cedar frames, BPA-free reservoirs, and solar-powered circulation pumps, allowing plants to thrive with minimal maintenance. Gardeners can enjoy perfectly hydrated and aerated plants without relying on electricity, timers, or complicated systems.

The product line includes:

- **Victory Grow Tower** – A vertical hydroponic system with up to 72 grow sites and a solar-powered water circulation pump.
- **Victory Mini Bucket** – Compact tabletop or corner planters (10”–48”) with self-wicking fabric

pots and water gauges.

- **Victory Bucket XL** – Raised beds with built-in self-watering reservoirs and durable AC Infinity fabric pots for precise plant hydration.

We wanted to create a gardening solution that is sustainable, beautiful, and simple to use, says Robert Reese, founder of Victory Garden Systems. “Our solar-powered self-watering planters give gardeners the freedom to grow fresh food anywhere, year-round, without waste or hassle.”

The Kickstarter campaign offers multiple reward tiers including mini buckets, full-size grow towers, and eco-survival accessories such as solar flashlights and hand-crank radios. Estimated delivery is December 2025, with worldwide shipping available.

About Victory Garden Systems

Founded by Robert Reese, Victory Garden Systems merges sustainable design with modern technology to empower individuals to grow their own food efficiently and stylishly. Every planter is designed to reduce plastic waste, conserve water, and bring fresh, healthy produce to homes everywhere.
