

Yostream Introduces Team Feature to Redefine Collaborative Live Streaming and Podcasting

New functionality empowers creators, brands, and organizations to manage live events seamlessly with role-based access and streamlined teamwork.

New Delhi, Delhi Oct 11, 2025 ([Issuewire.com](https://www.issuewire.com)) - [Yostream](#), the browser-based live streaming and podcasting software, today announced the launch of its much-anticipated [Team Feature](#), designed to simplify collaboration and enhance control for creators, organizations, and businesses managing live events.

The new Team Feature enables users to add **Admins** and **Co-hosts** to their Yostream account, assign roles with customizable permissions, and manage multiple streams securely—without sharing personal login credentials. With this update, Yostream is taking a significant step toward solving one of the biggest challenges in live streaming: collaborative management.

“Live streaming is rarely a one-person job,” said Piyush Singh, CEO, Yostream. “With the Team Feature, we’re giving creators and organizations the tools they need to collaborate effectively, manage responsibilities clearly, and go live with confidence.”

Key benefits of Yostream’s Team Feature include:

- **Role-Based Access:** Add team members as Admins or Co-hosts with defined permissions.
- **Secure Collaboration:** No need to share private login details—each member manages their role independently.
- **Workflow Efficiency:** Streamline event preparation, moderation, and execution across teams.

Ideal for **podcasters, gaming squads, digital event organizers, educators, and businesses**, the feature ensures that Yostream users can scale their streaming activities while maintaining full control and accountability.

The Team Feature is available immediately for all Yostream users.

About Yostream

Yostream is a browser-based live streaming and podcasting software that offers **multistreaming, low-latency broadcasting, and collaboration-friendly tools**. Built for creators, educators, businesses, and communities, Yostream enables seamless live streaming without the hassle of downloads or complicated setups.
