

18-Year-Old Launches Goping.in, A Free Online Platform for Jobs, Rentals, Services & Used Vehicles Across India

Goping.in is redefining how people in India find opportunities by offering a free platform to post classifieds, list businesses, discover jobs, rent properties, buy/sell used vehicles, and connect with trusted local service providers.

Margao, Goa Nov 9, 2025 ([IssueWire.com](https://www.IssueWire.com)) - In a time where people still rely heavily on scattered WhatsApp groups, informal referrals, and word-of-mouth to access everyday services, an 18-year-old from India, **Cephas Cardozo**, has launched [GoPing.in](https://Goping.in), a new online platform designed to make **local**

opportunities easier to find and share.

Goping.in is a free classifieds and local discovery platform where individuals and businesses can **post listings for jobs, services, rentals, used vehicles, properties, products, and more at no cost.** The goal is straightforward: **make it easier for people to connect with what they need in daily life.**

Cephas says that, “Goping” comes from the idea of a “ping” which is a signal that connects people. The platform helps people find work, services, rentals, small businesses, and local opportunities by making it easy to connect.

Why Goping.in Exists

Across India, millions of people look for:

- Jobs or part-time work
- Someone to repair something at home
- A rental flat or paying guest accommodation
- Affordable second-hand vehicles or household items
- A nearby tutor, electrician, beautician, caterer, or driver
- A way to promote their small business without advertising fees

But the problem is **information is scattered.**

People join various multiple WhatsApp groups, browse Telegram channels, ask neighbors, or scroll through social media stories hoping to find something relevant often finding nothing, or outdated posts.

Goping.in brings all of these day-to-day needs into one public, searchable place.

What Users Can Do on Goping.in

Individuals can:

- Post their personal services (e.g., home tutors, barbers, drivers, artists, fitness trainers, freelancers, repair technicians, etc.)
- Sell or give away used items such as phones, scooters, laptops, furniture, appliances, etc.
- Search for rental spaces, shared rooms, PGs, or flats.
- Apply for jobs or contact employers directly.

Small and Local Businesses can:

- Create a **public profile** so nearby customers can find them.
- Showcase their services or products.
- Receive direct inquiries without paying for promotions.

Real Estate Owners & Agents can:

- List flats, houses, commercial spaces, land, and PG accommodations.
- Manage multiple listings without any subscription fees.

Companies and Employers can:

- Post job openings **for free**, helping hiring become more direct and transparent.

Free, But Structured

While the platform is **entirely free**, it maintains quality through a simple and fair system:

- **Listings automatically pause every 7–14 days** to prevent outdated or inactive clutter.
- Users can **renew or repost with a single click**.
- This keeps the feed **fresh**, and helps **new listings get visible** instead of being buried.

This approach ensures **genuine visibility and relevance**, not overcrowding or spam.

Vision Behind Goping.in

Speaking about the initiative, Cephass says:

“I built Goping.in because I saw how complicated simple things had become. If someone needs a rental room, it shouldn’t take weeks. If someone offers services, they shouldn’t struggle to find customers. Opportunities exist they’re just not organized. I wanted to create a platform that helps people find what they need without paying or depending on luck.”

The platform reflects a growing need in India **local opportunities that are easily discoverable and accessible**, especially for:

- Students starting out
- Job seekers without networks

- Families looking for affordable rentals
- Small business owners trying to grow
- People selling or buying used items
- People shifting cities or states

Designed for Real Life, Not Just Tech-Savvy Users

A key priority was making the platform **simple**:

- No complicated onboarding
- No heavy app downloads required (web works smoothly)
- Contact details are displayed clearly
- No forced messaging system to restrict communication
- No bidding system or hidden charges

Users can simply:

- Visit Goping.in
- Post or search
- Connect directly

Even people **with basic smartphones and limited digital experience** can use it.

Expanding Across India

While the platform began development rooted in local needs, Goping.in is built for **nationwide use**. It is open to **every Indian city, town, and village**, supporting small, middle, and metro communities equally.

The long-term plan includes:

- State-wise discovery categories
- Local business reputation systems
- City-based trending listings
- Safety guidelines and verification labels

- Optional business boosts (still keeping core posting free)

However, the core purpose remains the same!

Give everyone access to opportunities without barriers or fees.

A Platform Built With Intention

Instead of raising funds first and building later — Cephas **built the product first**, focusing on solving a real problem before seeking attention or scale.

“This platform isn’t about competition. It’s about simplifying life. If someone finds work because of this, or rents a flat safely, or grows their business, then the platform has value. That’s the purpose.”

Start Using Goping.in

The platform is now **live** and open for users across India.
Anyone can explore, post, or share listings today.
