

98% Consistency, 0 Staff: Anno Robot Redefines Airport Coffee in 60 Countries

Shenzhen, Guangdong Nov 19, 2025 ([Issuewire.com](https://www.issuewire.com)) - As millions of travellers rush through terminals worldwide, one constant complaint has finally been solved: bad airport coffee served slowly by exhausted staff. Shenzhen-based [Anno Robot](#) has quietly eliminated both problems with fully robotic kiosks that deliver **98% brew-to-brew consistency** and require **zero human baristas**. By November 2025, these AI-powered stations are operating in airports and high-traffic hubs across **more than 60 countries**, marking a turning point for the entire unmanned retail industry.

The Perfect Storm Driving Airport & Travel Retail Automation

The global vending machine market is accelerating from **USD 21.46 billion in 2024** to **USD 23.11 billion in 2025**, reaching **USD 45.06 billion by 2034** at a **7.7% CAGR**. Within travel retail specifically, the airport segment alone is projected to grow at **9.2% CAGR through 2030**, driven by rising passenger numbers and severe staffing shortages.

Labour reality is the biggest catalyst. Post-pandemic, **25.3% of global food-service operators** report chronic staffing gaps, with airport concessionaires often facing **40-60% shift vacancies** during peak seasons. Traditional cafés routinely close counters after 10 p.m. or reduce menus because they simply cannot find night-shift baristas. Meanwhile, passenger expectations have flipped: **73% now demand contactless ordering** and **68% expect service in under 60 seconds**.

The broader AI-in-retail market validates the shift: **USD 14.24 billion in 2025 → USD 96.13 billion by 2030** (46.54% CAGR). Airports, train stations, and highway rest areas are the perfect proving ground — high fixed costs, 24-hour demand, and razor-thin staffing margins make full automation not just attractive but economically unavoidable.

Anno Robot: The Airport-Grade Solution That Actually Works

Founded in 2017 and recognised as a Chinese National High-Tech Enterprise, **Anno Robot** has become the undisputed leader in travel-retail robotics by solving the three problems every airport F&B director loses sleep over: consistency, uptime, and labour.

Core Advantages

- **98% brew consistency** across every cup, every hour, every country — verified by third-party sensory panels
- **Zero on-site baristas** required after initial 90-minute training
- **Lifetime system maintenance** + one-year full warranty
- **30% of annual revenue reinvested in R&D** → 70+ national patents, including 27 utility models that lock competitors out of core latte-art and micro-foam technology
- Full **CE / FCC / ISO 9001** certification for instant global airport compliance

Main Products Deployed in Airports

- **[AI Coffee Robot \(open & enclosed models\)](#)** Freshly grinds, tamps, extracts, and creates AI-guided latte art in <45 seconds. Supports WeChat Pay, Alipay, Apple Pay, and all major cards.
- **Robotic Ice Cream Kiosk** 30+ flavour matrix, 45-second service, UV self-cleaning — perfect for family gates.
- **AI Bartender Module** Zero-error cocktail pouring for lounge and landside bars.

All units are built for **overnight relocation**: an entire café can be wheeled to a new gate or terminal in under four hours to chase flight schedule changes.

Real Airport & Travel-Hub Cases (2024-2025)

- **Asia-Pacific hub** (50+ units): replaced eight traditional cafés, increased daily transactions **42%**, eliminated all night-shift payroll
- **Major European capital airport**: robotic latte-art stations in two terminals running **18 consecutive months with zero downtime**
- **North American international gateway**: 12 kiosks in transit halls achieved **6-month full ROI** during summer peak
- **Middle Eastern mega-hub**: ice-cream + coffee combo units placed landside, generating **300% higher dwell-time revenue** than traditional outlets

Every installation includes IoT remote monitoring, predictive maintenance alerts, and the famous

90-minute online training that turns any duty manager into a robot supervisor.

For airport operators facing staffing crises and rising minimum wages, Anno Robot is no longer a novelty — it is the new standard.
