

# AluGlobus Fence Unveils Factory-Direct Architectural Aluminum Gates, Fences & Cladding Systems Across the United States

Los Angeles, California Dec 19, 2025 ([IssueWire.com](http://IssueWire.com)) -

- **LOS ANGELES, CA** — AluGlobus Fence today announced the nationwide expansion of its

factory-direct architectural [aluminum gates, fences, wall cladding](#), and railing systems, marking a significant milestone for one of the country's most trusted providers of modern, high-durability aluminum solutions. Since its establishment in 2016 at 16721 Roscoe Boulevard in Los Angeles, the company has rapidly evolved from a local fence supply store into a premier U.S. manufacturer, delivering advanced architectural systems to residential, commercial, and industrial markets across all 50 states.

The announcement reinforces AluGlobus Fence's long-standing commitment to innovation, structural performance, and American craftsmanship values that continue to position the company as an industry leader in aluminum manufacturing and distribution.

## **A New National Standard for Architectural Aluminum Systems**

AluGlobus Fence manufactures every product using high-grade 6063-T6 architectural aluminum, an alloy renowned for its strength, corrosion resistance, structural stability, and exceptional longevity. The company's advanced powder-coating technology enhances weather resistance, ensuring consistent, fade-proof protection against rain, salt air, UV exposure, and harsh seasonal climates.

With contractors, architects, developers, and property owners demanding solutions that require minimal maintenance while achieving maximum aesthetic appeal, AluGlobus Fence now provides a streamlined, factory-direct model that offers faster access, lower costs, and superior quality.

AluGlobus Fence's expanded product portfolio now reaches nationwide markets with full availability for:

- Modern aluminum fences engineered for long-lasting property protection
- Custom driveway and pedestrian gate systems
- Architectural wall cladding and façade solutions
- Commercial and residential railing systems
- Integrated security enhancements, including gate automation and access control

Each system is engineered to combine strength, sleek design, and resilience—making it suitable for modern homes, multi-family developments, commercial plazas, industrial complexes, and high-traffic public spaces.

## **Factory-Direct Distribution: A Strategic Shift for Builders and Property Owners**

AluGlobus Fence's new nationwide distribution model eliminates layers of intermediaries,

enabling clients to purchase premium aluminum systems directly from the manufacturer. This approach significantly reduces project costs, shortens lead times, and ensures complete transparency in materials, specifications, and craftsmanship.

Factory-direct access also ensures clients receive:

- Consistent quality control across every component
- Precision engineering from in-house specialists
- Custom fabrication capabilities for complex architectural designs
- Reliable timelines and efficient order fulfillment
- Nationwide shipping with dedicated technical support

This model empowers builders, contractors, and designers to implement long-lasting aluminum systems that elevate both structural performance and architectural character.

## **Modern Architectural Solutions Built for Today's Demands**

The company's aluminum systems are designed to resist warping, cracking, rusting, and fading issues commonly associated with traditional wood, steel, and vinyl materials. With rising demand for sustainable, low-maintenance construction materials, AluGlobus Fence answers the call with sleek, durable solutions that maintain structural integrity for decades.

Key benefits include:

- **Enhanced security** with reinforced profiles and precision-fit assemblies
- **Weather resistance** that supports coastal, desert, and high-moisture environments
- **Lightweight engineering** that reduces installation complications and material waste
- **Architectural versatility** suited for both classic and contemporary designs
- **Eco-friendly upgrades**, offering long-term sustainability compared to traditional materials

The combination of industrial-grade strength and modern, minimalist design has made AluGlobus Fence a preferred choice for projects requiring both visual appeal and long-lasting reliability.

## **Supporting Contractors, Developers & Homeowners Through Expert Guidance**

Beyond manufacturing, AluGlobus Fence provides comprehensive professional support designed to simplify the planning, installation, and integration of each system. Clients nationwide can access:

- Technical consultations with in-house product specialists
- Custom engineering for non-standard project specifications
- Guidance on installation, automation systems, and security integrations
- Professional coordination with local contractors and developers
- Ongoing customer support throughout the lifecycle of each project

This hands-on approach reflects the company's dedication to delivering not only premium products but a seamless customer experience grounded in reliability and trust.

## **A Commitment to Long-Term Value, Craftsmanship, and Customer Satisfaction**

AluGlobus Fence's rise as one of the nation's leading aluminum system providers stems from its unwavering dedication to craftsmanship and structural excellence. With each product manufactured to meet the demanding expectations of modern construction standards, the company continues to reinforce its reputation for durability, design clarity, and long-term performance.

By combining factory-direct pricing, nationwide accessibility, and industry-leading materials, AluGlobus Fence empowers clients to invest in architectural solutions that enhance safety, aesthetics, and property value for years to come.

## **About AluGlobus Fence**

Since 2016, AluGlobus Fence has served as a premier fence supply store located at 16721 Roscoe Boulevard, Los Angeles, CA. Specializing in architectural aluminum systems, the company is a trusted wholesaler and manufacturer of premium fences, gates, wall cladding, and railing systems across the United States. Every product is crafted from high-quality 6063-T6 aluminum and finished with weather-resistant powder coating for enduring strength and long-lasting performance. With factory-direct pricing, nationwide shipping, and expert installation support, AluGlobus Fence delivers sleek, modern, and durable solutions designed to elevate

both residential and commercial properties.
