New Delhi, Delhi Nov 4, 2025 (Issuewire.com) - Bagla Group, a leading name in innovative packaging solutions, proudly announces the launch of its latest **7-layer Thermoforming Films**, engineered for superior performance, precision, and sustainability. This cutting-edge product is designed to meet the evolving demands of the global packaging industry, especially in the **food industry**.

Built using **Cool Bubble Technology from Kuhne, Germany**, these Thermoforming Films set new benchmarks for quality and reliability. The films are produced with advanced multilayer extrusion technology to ensure exceptional **clarity, strength, and barrier protection** - making them ideal for applications requiring extended shelf life and visual appeal.

Key Product Highlights

- **Number of Layers:** 7
- **Width:** 1500 mm
- **Thickness Range:** 70–300 µm
- **Output Capacity:** Up to 1200 kg/h

- **Infrastructure:** Cool Bubble Technology, Kuhne, Germany

“With the introduction of our new 7-layer Thermoforming Films, Bagla Group reinforces its commitment to global quality standards and sustainable packaging innovation,” said **Nakul Bagla, CEO**. “This addition strengthens our product portfolio and provides our clients with reliable, high-barrier films that combine performance, versatility, and cost-efficiency.”

These films are ideal for **vacuum packaging, MAP (Modified Atmosphere Packaging), and form-fill-seal applications**, offering strong puncture resistance and high formability without compromising clarity or seal integrity.

About Bagla Group

Bagla Group is a **leading manufacturer of innovative packaging solutions** serving global clients across FMCG, food, pharma, and industrial sectors. With state-of-the-art manufacturing facilities and a commitment to excellence, the company continues to pioneer new technologies that redefine packaging efficiency and sustainability.
