

## Concierge Dentistry Reinforces Its Commitment to Restorative Dentistry in Los Angeles

**Los Angeles, California Nov 24, 2025** ([Issuewire.com](https://www.issuewire.com)) - Concierge Dentistry, located in West Los Angeles, is proud to highlight its expertise in [restorative dentistry Los Angeles](#), offering a full spectrum of restorative services in a modern, patient-focused environment. With a philosophy of “all specialties under one roof,” Concierge Dentistry ensures continuity of care and exceptional outcomes for every individual who walks through its doors.

### **Comprehensive Restorative Care with Advanced Technology**

At Concierge Dentistry, restorative dentistry is not just about repairing damage—it’s about preserving function, improving aesthetics, and promoting long-term oral health. Their cutting-edge office is equipped with advanced technology, including **cone beam CT (CBCT)** imaging, which offers detailed

3-D views of teeth and jaw structure. For many restorative procedures, Concierge employs **CEREC® same-day crowns and bridges**, allowing patients to receive a precise, tooth-colored restoration in a single visit—eliminating the need for temporaries or multiple appointments.

The practice also integrates **Waterlase® laser technology** in certain treatments. This laser-based approach reduces the need for anesthesia, drilling, and injections, offering a gentler, more comfortable experience.

### **Patient-Centered Philosophy**

From the moment a patient reaches out to Concierge Dentistry, the team emphasizes compassion, education, and individualized treatment. According to the practice's mission statement, they are dedicated to delivering top-tier care in a soothing, educational environment, making sure each patient feels heard and informed. Dr. Davita Danesh and Dr. Jay S. Grossman lead their team with over three decades of combined experience, having supported more than 10,000 patients in achieving healthier, more confident smiles.

### **Specialized & Multidisciplinary Restorative Services**

Concierge Dentistry offers a cohesive, multidisciplinary model that brings restorative dentistry together with cosmetic, periodontal, endodontic, and implant services. Whether you need a crown, a bridge, or a more complex rehabilitation, this integrated approach ensures that restoration is supported by the broader health of your teeth and gums.

### **Tailored Support & Flexible Financing**

Understanding that cost can be a barrier to care, Concierge Dentistry offers flexible financing through **CareCredit** and **Cherry**, allowing patients to manage their treatment expenses in a way that works for them. Their billing team also works diligently to maximize insurance benefits for each patient.

### **A Practice Rooted in Compassion**

Beyond clinical excellence, Concierge Dentistry is deeply committed to serving the wider community. Their nonprofit initiative, **Homeless Not Toothless**, has provided free dental care to underserved populations for years. Additionally, for patients recovering from addiction, the clinic offers specialized restorative treatment, coordinating with rehabilitation teams and providing sedation or anesthesia when needed.

### **Accessible in Los Angeles**

Concierge Dentistry's office is centrally located at **11980 San Vicente Boulevard, Suite 507, Los Angeles, CA 90049**, making it accessible to residents throughout Brentwood, Santa Monica, Beverly Hills, and surrounding neighborhoods. Appointments can be made by calling (310) 820-0123 or via the online booking option.

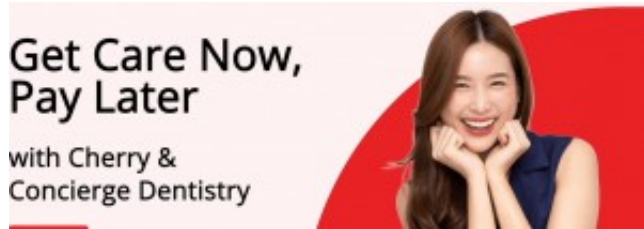

For patients seeking trusted **restorative dentistry in Los Angeles**, [Concierge Dentistry](#) provides a refined, compassionate, and technologically advanced path to restore both oral health and confidence.
