The 2 Steps That Take Your Design to Delivery

The first step is clearly to reach out to this impeccable patch-making vendor through their official website. However, the second step is a little elaborate. Let us break it down for you.

Once you connect with the designer, he will ask you to fill out the form on the website. It has 6 sub-sections and must be filled with great attention. The look of your final product will depend on the choices

you make here.

- Start by selecting the embroidery coverage (50%, 75% or 100%).
- The second step is to select the size and delivery. So, add in the dimensions of units you are looking forward to, such as the width, the height, and in the end choose between standard and express delivery.
- Step three is to select the required quantity that goes from a minimum of 25pcs to and maximum of 1000 pcs.
- The fourth part is where you select the backing type.
- After that is the choice of thread type (normal, metallic, or madeira)
- Lastly, name your design, write any other supportive details about it, upload your artwork, add your contact details, and submit the quote.

That is it. Once you hit that button, the consultant at Embroideredpatch.ca will reach out to you, and you can begin your patch-making journey.
