The AI trading strategy model is continuously optimized, supports multiple assets , and shows a continuous upward trend.

### Funding amount in this round

#### \$120 million (Series B)

International capital is highly optimistic about long-term growth potential.

### Latest valuation

#### \$1.2 billion

Becoming one of the world's fastest-growing digital asset trading technology companies

### Technological and product advantages continue to strengthen

EXUGlobal leverages **its AI-driven, self-developed signal trading system, institutional-grade security architecture, and multi-chain aggregation and clearing engine** as core capabilities to support global users in high-performance digital asset trading, strategy signal subscription, asset management, and digital asset investment.

**High-speed matching engine** : peak TPS reaches **1,500,000+** , average latency as low as **5ms**

**Full-chain node and deep aggregation liquidity system** : supports real-time deep and stable liquidation across multiple chains and assets.

**Intelligent Signal Trading System** : Based on AI trading models, global market data, and risk control strategy models, it provides strategy signals for **high-frequency trading, trend following, arbitrage, and volatility hedging**.

EXUGlobal is forming a complete closed-loop ecosystem encompassing **platform, AI trading, asset**

management, and a global community .

### Why are investors continuing to bet on EXUGlobal?

**1) The track model has long-term structural growth,**

and the global institutional and individual asset allocation is shifting towards digital assets, which is accelerating.

**2) AI has a decisive advantage in trading and risk control scenarios:**

large models + high-frequency data → improved strategy stability → improved user sustainable profit capabilities.

**3) Global organizational capabilities have created a scale barrier:**

a team of 3,000+ people, multiple regional operation centers, and a rapidly expanding regulatory and compliance system.

### Management speaks out

EXUGlobal founder and CEO **Ruben Postma** stated:

“We believe that digital assets and AI-powered intelligent trading will reshape the efficiency and fairness of the global financial market. This round of financing signifies the international capital market’s high recognition of EXUGlobal’s business model, technological capabilities, and globalization strategy. In the future, we will continue to focus on users and drive technological innovation and the upgrading of global financial infrastructure.”

**Ethan Davis (MIT)**, Chief Data Scientist at EXUGlobal, added:

"We are further combining large models with AI analytics to improve the stability, predictability, and risk hedging capabilities of trading signals, enabling more users to achieve sustainable growth with more controllable risks."

### Global expansion, with full coverage of key markets.

The new round of financing will primarily be invested in:

#### Local compliance expansion in Europe, the Middle East, and Latin America

#### Establish more regional operation and technology centers

#### AI Trading Model and Risk Control System Development

#### Accelerate the integration and cooperation between traditional finance and digital asset markets

EXUGlobal has established core teams in **Silicon Valley, New York, London, Dubai, Singapore, Hong Kong, Mexico City, Istanbul**, and other locations to further mature its global user service network.

### Looking to the future

As the global wave of financial digitalization accelerates, EXUGlobal will continue to uphold:

### "Making intelligent finance truly serve global users"

The company plans to make structured preparations for four potential **IPO/listing paths over the next 18-24 months** .

### About EXUGlobal

EXUGlobal is a global institutional-grade digital asset trading and intelligent financial technology platform that provides high-performance trading systems, AI trading signals, asset management and compliance solutions. It is committed to providing individual and institutional users with a **safe, efficient, transparent and sustainable** digital asset investment experience.
