

## Fanless Embedded Box PC|IoT Gateways|Embedded PC|Portwell India

Portwell manufactures wide range of fanless embedded box-pc, Embedded IoT Gateways with wide DC-inputs, RICH I/O, with PCI and PCI Express slot, from Atom/Celeron to Intel i9 range, for transportation, KIOSK, military, Toll, IoTs. Enquire Now!

**Bengaluru, Karnataka Nov 13, 2025 ([IssueWire.com](https://www.issuewire.com))** - Portwell India, a leading provider of industrial computing and embedded systems, has launched its new range of Embedded Box-PC solutions designed for high performance and reliability in harsh industrial environments.

Built with Portwell's industrial embedded computing technology, the WEBS series of rugged fanless PCs are ideal for factory automation, transportation, facility management, and edge computing. Each system is engineered using precise thermal simulation to ensure stable performance under tough operating conditions.

The all-aluminum fanless chassis enables efficient heat dissipation, ensuring long-term durability and low maintenance. Powered by the latest Intel® Celeron®, Atom®, and Core™ processors, these Embedded Box-PCs deliver superior performance with low power consumption—making them perfect for energy-critical applications.

Key models in the series include:

- WEBS-45H1 / WEBS-85H1: Fanless systems with 10th Gen Intel® Core™ processors
- LYNX-612 Series: Industrial NUC-type systems with Microsoft IoT Edge certification
- PBC-02013: Versatile fanless Box-PC supporting multiple Intel® generations

Designed for industrial automation and IIoT applications, Portwell's systems feature dual LAN, COM ports, HDMI/VGA connectivity, and wide temperature support, enabling seamless integration into industrial control and monitoring systems.

Our goal is to empower industries with intelligent, rugged, and scalable computing," said a Portwell India spokesperson. The new [Fanless Embedded Box PC](#) lineup reflects our commitment to innovation and reliability for modern automation and edge applications."

## About Portwell India

Portwell India specializes in Industrial PCs, Embedded Box-PCs, Panel PCs, and IoT computing solutions. With a focus on innovation and quality, Portwell delivers reliable hardware platforms for manufacturing, logistics, and automation sectors.
