

Global Women Leadership in Sustainability

How Wei Ling Wang Is Advancing Cross-Border Collaboration in the Circular Materials Economy

Northern Taiwan, Taiwan Nov 9, 2025 ([IssueWire.com](https://www.issuewire.com)) - As the world enters a new era of sustainability, women leaders are increasingly shaping how industries reduce waste, redesign supply chains, and create meaningful circular impact. Among these emerging global voices is **Wei Ling Wang**, the visionary **Founder of Uprime Link Enterprise LLC** (United States) and **Founder of Ju Wei Industrial Co., Ltd.** (Taiwan).

With more than 13 years of experience in international trade, recycled plastics, EPDM, ENGAGETM, and cross-border logistics, Wang is recognized for connecting the strengths of Australia, Asia, Southeast Asia, and North America to build a more circular global materials ecosystem.

Today, she focuses on a mission-critical role:

linking Australia's growing RPET and recycling potential with Asia's processing capacity —

while coordinating the import of RPET and recycled materials from the United States and Canada into Asia's circular manufacturing system.

Her leadership demonstrates how women are redefining sustainability and global trade at the highest level.

Q&A INTERVIEW FEATURE

Q1: You founded both Uprime Link Enterprise and Ju Wei Industrial Co., Ltd. What inspired you to build two companies across different countries?

Wei Ling Wang:

"I founded both companies to serve one vision — connecting global regions that hold the key parts of the circular economy.

Ju Wei Industrial Co., Ltd. gave me more than a decade of experience in international materials trading. But as sustainability became more urgent worldwide, I created Uprime Link Enterprise to expand this work globally.

Today, my purpose is to bridge Australia's recycling sector with Asia's large-scale processing capability, while also coordinating the flow of RPET from Canada and the United States into Asia's circular manufacturing network."

Q2: Why is Australia so important in the future of circular materials?

Wang:

"Australia has high-quality PET feedstock, strong recycling commitments, and a rapidly growing interest in RPET and sustainable materials.

Although recycling capacity is expanding, the region benefits enormously from collaboration with Asia's processing scale. That's why I'm deeply interested in partnering with Australian RPET and recycling companies — together we can build faster, more efficient, and more global circular systems."

Q3: How do your companies help build a complete circular-material loop?

Wang:

"My work connects all the major regions involved in today's circular economy:

Australia — high-quality feedstock, expanding RPET infrastructure

Asia & Southeast Asia — world-class washing, pelletizing, compounding, and manufacturing

United States & Canada — reliable sources of RPET and recycled materials

By coordinating the movement of RPET from North America into Asia's processing hubs — and supporting collaboration with Australia's recycling sector — we create a complete, efficient, and truly circular material loop.

This cross-border alignment is essential for global sustainability."

Q4: As a woman founder in a male-dominated industry, what does leadership mean to you?

Wang:

“Leadership is about connection and responsibility.

The circular economy is not just about materials — it’s about people, partnerships, and long-term systems that support global change. Women naturally lead with collaboration, resilience, and empathy, which are exactly the qualities sustainability requires.

I lead with transparency, global awareness, and a strong belief in the power of cross-border cooperation.”

Q5: What is your long-term vision for your companies?**Wang:**

“My vision is to build one of the world’s most trusted circular-materials networks — where plastic is no longer waste, but opportunity.

Opportunity for manufacturers.

Opportunity for innovation.

Opportunity for global environmental impact.

I aim to strengthen:

1.Collaboration with Australia’s recycling and RPET industries

2.Processing and manufacturing connections across Asia & Southeast Asia

3.The import and flow of RPET from Canada and the United States into Asia’s circular manufacturing ecosystem

The future of sustainable materials will be built on cross-border collaboration — and I want my companies to help lead that transformation.”

ABOUT WEI LING WANG

Wei Ling Wang is the **Founder of Uprime Link Enterprise LLC** (USA) and **Founder of Ju Wei Industrial Co., Ltd.** (Taiwan). With more than 13 years of experience in recycled plastics, EPDM, ENGAGE™, RPET, and global supply-chain operations, she is recognized for her ability to connect Australia, Asia, Southeast Asia, and North America through sustainable and transparent circular-material networks.

Her leadership reflects deep industry expertise, strong international vision, and a commitment to advancing women in global sustainability and trade.

ABOUT UPRIME LINK ENTERPRISE LLC

Uprime Link Enterprise connects Asia, Australia, and North America through advanced circular supply chains. The company specializes in rPET, HDPE, PP, and recycled industrial materials. Its mission is: **Turning Plastic Into Opportunity — transforming waste into value and value into global impact.**

ABOUT JU WEI INDUSTRIAL CO., LTD.

Founded in Taiwan, **Ju Wei Industrial Co., Ltd.** is a global trading company with over 13 years of

experience supplying EPDM, ENGAGE™, recycled plastics, and industrial raw materials across Asia, Southeast Asia, and North America.

Ju Wei plays a key role in:

International sourcing and logistics

Recycled-material coordination

Cross-border supply chain management

Connecting Australia's RPET opportunities with Asia's processing and manufacturing capacity

Importing RPET from the United States and Canada into Asia's circular production system

With its cross-border partnerships and deep supply-chain experience, Ju Wei Industrial supports the development of a more sustainable global materials ecosystem.
