

ICSP.VN Selects VergelO to Power ZENDCLOUD and Accelerate Digital Transformation for Vietnamese Enterprises

Singapore, Singapore Nov 5, 2025 ([Issuewire.com](https://www.issuewire.com)) - Transformists Network Pte Ltd, the exclusive Value-Added Distributor for VergelO in Asia Pacific, today announced a strategic technology partnership with ICSP.VN, a trusted Vietnam-based IT solutions and infrastructure provider. ICSP.VN has selected the **VergeOS Ultraconverged Infrastructure (UCI) platform** as the core foundation for its next-generation **ZENDCLOUD** platform—an enterprise-grade local cloud service designed to simplify and accelerate digital transformation for businesses across Vietnam.

This deployment marks a major milestone in ICSP.VN's journey to deliver a **fully unified cloud experience**, signaling the region's rapid transition away from complex, costly legacy virtualization systems toward agile, efficient, and scalable infrastructure built for modern digital operations.

"This win with ICSP.VN is a powerful testament to VergelO's value proposition in the Asia Pacific market," said **Nicholas Yong, CEO** at Transformists Network. "ICSP.VN's ZENDCLOUD vision aligns perfectly with VergelO's Ultraconverged approach—removing the unnecessary complexity of traditional multi-layer infrastructure and empowering cloud providers to deliver reliable, high-performance services with superior performance and cost efficiency. Vietnam's enterprises are clearly ready for unified

simplicity."

Nguyen Pham Truong Giang, CTO at ICSP.VN, added "As a provider specializing in optimized IT solutions for enterprises, we've built **ZENDCLOUD** to represent the next evolution of local cloud infrastructure in Vietnam—fast, resilient, and cost-effective. By leveraging VergeOS, we can virtualize and consolidate compute, storage, and networking into a single cohesive system. This not only simplifies our internal data center management but also enhances the service quality we deliver to our ZENDCLOUD customers. VergeOS enables us to focus entirely on innovation and digital transformation, instead of diverting resources to maintain legacy systems."

About VergelO

VergelO delivers VergeOS, the Infrastructure Operating System that unifies virtualization, storage, networking, data protection, and AI into a single platform. Built around four strategic pillars—exit VMware without disruption or licensing risk, repatriate workloads from costly public clouds, improve cyber resiliency through integrated architecture, and prepare for AI by consolidating infrastructure into a unified platform—VergeOS replaces fragmented solutions with one consistent platform. Each service shares the same codebase, management interface, and update cycle, enabling IT teams to deploy new capabilities without new infrastructure or complexity. The result is a more resilient, efficient, and adaptable foundation that grows with your business.

About Transformists Network

Transformists Network Pte Ltd is a Singapore-headquartered Value-Added Distributor (VAD) specializing in bringing unique, cutting-edge infrastructure and cybersecurity solutions to the Asia Pacific region. With a focus on collaborative partnership and innovation, Transformists Network is dedicated to empowering its technology partners, providing enablement, training, and strategic resources to help clients realize the full potential of advanced technologies in the digital economy.
