

Instatow Publishes 2025 Towing Price Guide to Help Perth Drivers Avoid Overcharging

New guide outlines fair towing costs, standard rates and what WA drivers should expect to pay.

Perth, Western Australia Dec 19, 2025 ([Issuewire.com](https://www.issuewire.com)) - Instatow has released a comprehensive 2025 towing price guide to help Perth drivers understand fair, transparent pricing before booking a tow.

With towing costs often varying widely across Western Australia, the guide breaks down standard hook fees, per-kilometre rates, after-hours charges and common add-ons.

The guide is designed to give drivers clarity during stressful breakdown situations, and to reduce the likelihood of overcharging from operators who do not disclose pricing upfront.

According to Instatow's analysis of real towing data across Perth, a fair price for a standard tow in 2025 includes:

- Hook fee: \$135 - \$165

- Per-kilometre rate: \$3.50 - \$4.50
- After-hours surcharge: only when genuinely applicable
- Additional charges: winching, lockouts, heavy machinery transport where required

"In a moment of stress, most people don't know what a tow should cost. We published this guide to put the power back into the driver's hands," said Josh, spokesperson for Instatow. "Clear, upfront pricing is the foundation of the service we provide."

Instatow's platform connects customers to the nearest available tow truck in seconds, showing the full price before booking, eliminating uncertainty and surprise fees.

The full 2025 Perth towing price guide is available at:

The guide also includes tips on avoiding unnecessary charges, understanding call-out fees, and how to recognise transparent towing operators in Western Australia.

Instatow currently supports more than 150 suburbs across the Perth metropolitan area and continues to expand its operator network.
