

Jaimax Announces Public Pre-Sale of JMC Coin for Early-Stage Participants

Hyderabad, Telangana Nov 13, 2025 ([Issuewire.com](https://www.issuewire.com)) - Jaimax has officially announced the public pre-sale of its digital asset, JMC Coin, opening an early-stage opportunity for individuals and organizations to participate in the company's expanding financial ecosystem. The pre-sale marks a significant milestone in Jaimax's effort to develop accessible digital financial tools designed for global use.

The JMC Coin is developed to serve as the primary medium of exchange within the Jaimax ecosystem, supporting transactions across wallets, merchant platforms, and integrated payment services. The pre-sale is structured to ensure fair participation, allowing early users to acquire tokens prior to the public exchange listing.

Jaimax stated that the funds raised during this phase will be directed toward scaling infrastructure, expanding payment gateways, and enhancing transaction security. The company emphasized its focus on transparency and accountability, with detailed tracking mechanisms built into its distribution framework.

The pre-sale initiative aligns with Jaimax's broader mission to simplify digital transactions and promote wider adoption of decentralized financial tools. Interested participants can access detailed information and verified links directly through the company's official website, <https://jaimax.com>.

Jaimax representatives noted that the pre-sale will remain open for a limited duration, after which unsold tokens will be allocated to ecosystem development and long-term stability reserves.

For updates and official announcements, users are advised to follow company communications via verified Jaimax channels.
