

Keyoma Announces Breakthrough Batana Oil With Rosemary

A New Standard in Natural Hair Growth for Low Porosity Hair

New York City, New York Nov 24, 2025 ([Issuewire.com](https://www.issuewire.com)) - Keyoma, a leading New York-based brand in science-backed natural beauty, is proud to announce the launch of **Keyoma Batana Oil with Rosemary**, a premium hair growth formula designed to support fuller, stronger, and healthier hair without synthetic chemicals. This release marks a major milestone in Keyoma's dedication to clean beauty that honors heritage and delivers real results.

Batana oil, long celebrated in the Miskito community, has gained international recognition for its ability to reduce thinning, restore shine, and promote hair density. Keyoma has elevated this powerhouse ingredient by pairing pure, ethically sourced batana oil with high-grade rosemary extract — a botanical widely known for supporting scalp stimulation and encouraging healthy growth cycles. The formulation is rapidly gaining momentum among beauty professionals and consumers seeking effective, nature-based alternatives.

A standout benefit of the new product is its performance on **low porosity hair**, a hair type known for resisting moisture absorption and struggling with dryness, brittleness, and frizz. Unlike traditional oils that sit on the hair cuticle, **Keyoma Batana Oil** is processed to penetrate more deeply, helping fortify strands from the inside out. Early testers have reported softer curls, reduced breakage, improved elasticity, and enhanced natural shine after consistent use.

The global beauty community is also exploring the comparison of **Batana Oil vs. Minoxidil**, as people increasingly shift toward natural growth solutions that avoid irritation and chemical side effects. While minoxidil remains widely recognized, batana oil is rapidly emerging as a powerful contender — particularly for those prioritizing scalp health, long-term hair resilience, and clean beauty routines. Keyoma is committed to leading this movement by advocating for science-aligned natural alternatives.

Beyond scalp and hair growth, **Keyoma Batana Oil** has shown impressive results for **eyebrows, hairlines, and edges**, making it a multi-use product for both women and men seeking fullness and restoration.

“At Keyoma, our mission is to bring the most effective natural ingredients to the forefront of beauty and hair care,” said a spokesperson for Keyoma. “Batana oil has been overlooked for decades despite its extraordinary benefits. We’re honored to make it accessible in its most premium form, elevated with modern refinement and backed by global demand.”

With interest surging across the United States and abroad, Keyoma is preparing additional educational initiatives to raise awareness of **batana oil for low porosity hair** and the role of natural botanicals in strengthening and revitalizing hair.

Keyoma Batana Oil with Rosemary is now available exclusively through the official Keyoma website, with additional retail partnerships scheduled for 2026.
