

Lone Star Decorative Concrete Supply Denver Expands to Meet Growing Demand from Colorado Contractors

Denver-based epoxy supply store responds to surge in small-contractor and DIY projects across Colorado with expanded inventory and expert product support.

Denver, Colorado Nov 16, 2025 ([IssueWire.com](https://www.issuewire.com)) - Lone Star Decorative Concrete Supply Denver, a specialty retailer serving Colorado's concrete coating industry, has announced an expansion of its product inventory and in-store resources to accommodate increased demand from contractors and do-it-yourself installers throughout the state.

The expansion comes as Colorado experiences significant growth in small contracting businesses and residential improvement projects. Lone Star Decorative Concrete Supply Denver provides professional-grade epoxy coatings, application tools, and technical guidance to installers at all experience levels across the region.

"We're seeing contractors launch new businesses at a rate we haven't seen before, and homeowners are taking on more ambitious projects themselves," said Jorge Rodriguez, representative of Lone Star Decorative Concrete Supply Denver. "Our role is to make sure everyone who walks through our door has access to proven products and honest answers, whether they're coating their first garage floor or running a crew that's been in business for decades."

The store specializes in carrying only tested, professional-grade materials used by experienced installers. In addition to product sales, Lone Star Decorative Concrete Supply Denver offers hands-on product knowledge and application guidance to help customers select appropriate materials for specific project conditions.

Unlike online-only suppliers, the Denver location allows contractors and DIYers to examine products in person, discuss project challenges with knowledgeable staff, and access immediate inventory without shipping delays. The store serves customers throughout Colorado, from Front Range metro areas to mountain and rural communities.
