

Neurealm and CoreStack Partner to Redefine Intelligent Multi-Cloud Governance and Accelerate Digital Transformation

Princeton, New Jersey Nov 13, 2025 ([IssueWire.com](https://www.issuewire.com)) - Neurealm, an AI-first tech services company, today announced a strategic partnership with CoreStack, a global leader in AI-powered cloud governance and security, to deliver a new era of intelligent, secure, and efficient multi-cloud operations. This collaboration marks a major step forward in Neurealm's mission to help enterprises modernize with confidence — combining Neurealm's deep expertise in digital transformation and platform engineering

with CoreStack's award-winning governance, security, and automation platform. Together, the companies are empowering organizations to innovate faster, operate smarter, and optimize cloud investments with full visibility and control.

Driving Business Impact Through Intelligent Governance

As enterprises scale across multiple clouds, the complexity of managing cost, security, and compliance continues to rise. Through this alliance, Neurealm and CoreStack are introducing an integrated approach that unifies financial, operational, and security governance under one intelligent framework.

- Accelerate digital transformation through intelligent automation and continuous compliance.
- Reduce cloud waste and optimize spend via CoreStack's FinOps+ capabilities.
- Strengthen security and governance posture through SecOps frameworks aligned with HIPAA, PCI-DSS, and other industry standards.
- Simplify cloud operations with real-time visibility, policy-based orchestration, and end-to-end operational intelligence.

"Through our partnership with CoreStack, we're empowering enterprises to move faster and smarter across clouds — turning governance into a catalyst for innovation. Together, we believe the future of digital transformation will be shaped by intelligence, automation, and trust." - Harmeet Chauhan, CEO, Neurealm

"Our strategic alliance with Neurealm is more than a partnership — it's a catalyst for intelligent transformation across industries. By fusing CoreStack's AI-powered governance with Neurealm's cognitive technologies, we're unlocking a new frontier in healthcare: where cloud-native automation accelerates innovation, safeguards compliance, and empowers care delivery like never before."
- Ezhilarasan (Ez) Natarajan, CEO, CoreStack

Strategic Alignment and Growth Vision

This partnership supports Neurealm's broader growth strategy of building business through ecosystem expansion and technology alliances. By integrating CoreStack's governance technology within Neurealm's RunOps and Cloud Transformation practices, the company strengthens its ability to deliver end-to-end modernization solutions that align with customer priorities in performance, security, and sustainability.

Initial joint offerings — including Neurealm Govern Ops powered by CoreStack — will be targeted toward regulated industries such as healthcare, financial services, and technology, where cloud adoption requires both agility and compliance.

About Neurealm

Neurealm is the right-sized partner for Engineering, Modernization, and RunOps, blending human intelligence with the latest technologies to help businesses across industries such as Healthcare, Technology, and others, make smart progress.

With offerings in Digital Platform Engineering, Data, AI, Cybersecurity, and Technology Operations, and delivery centers in India and the US, we empower 250+ global enterprises. Driven by an engineering mindset and powered by Neurealm Labs—our innovation engine—we transform ideas into real-world impact through new-age offerings, solutions, frameworks, and accelerators. Our strong technology

alliances and academic partnerships further power the future-ready ecosystems we build for our clients. Learn more at www.neurealm.com.

About CoreStack

CoreStack is an AI-powered next-generation cloud governance and security platform that enables enterprises to govern, optimize, and secure multi-cloud environments. The platform currently manages over US \$2 billion in cloud spend across 750+ global enterprises. Founded in 2016 and headquartered in Bellevue, Washington, with operations in India, CoreStack is backed by approximately US \$96 million in funding and recognized by Gartner, Forrester, IDC, and Frost & Sullivan for innovation in multi-cloud governance. CoreStack's CR360™ System of Intelligence unifies FinOps+, SecOps, and CloudOps capabilities, giving organizations a single system of record to automate, optimize, and secure their cloud operations.
