

New Gardening App “Your Growing Companion” Launches

A new app designed specifically for home growers, allotment gardeners, and smallholders.

Banbury, Oxford Nov 25, 2025 ([Issuewire.com](https://www.issuewire.com)) - **Your Growing Companion**, created by organic gardener and YouTube educator *Simon Adams*, offers an easy, clutter-free way for gardeners to track their planting, tasks, harvests, and yearly progress – without ads, subscriptions, or complicated features.

The app is launching with an exclusive **7-day free trial**, followed by a **special December offer of a one-time \$9.99 lifetime access**. From January 1st, 2026, the app will move to a yearly subscription of \$9.99.

A Simple Tool Born From Real-World Frustration

The idea for *Your Growing Companion* came not from the tech world, but from a real garden.

“As my own growing space expanded, I found it increasingly difficult to keep track of sowing dates, bed rotations, monthly tasks, and harvest timelines,” says **Simon Adams**, the app’s creator and the face behind the *Diary of an Organic Grower* YouTube channel. “Most gardening apps were either packed with ads, too complicated, or required expensive subscriptions just to unlock basic features. So I built the app I wished existed — something simple, practical, and distraction-free.”

Key Features

Your Growing Companion includes:

Planting & Harvest Tracking

Log what you plant, when you sow it, and when it's ready to harvest.

Monthly Garden Task Lists

Pre-loaded tasks for every month, based on real organic gardening practices.

Integrated Learning

Each crop and task can be linked directly to Simon's YouTube videos and Substack articles for educational support.

Yearly Overview Dashboard

See your progress across the growing season at a glance.

Photo Uploads for Your Crops

Document how each bed or crop performs over time.

Ad-Free, Clean, and Simple

A user-first tool that keeps gardening enjoyable rather than overwhelming.

Built for Beginners and Experienced Growers Alike

From allotment beginners just learning how to sow carrots to experienced gardeners managing multiple beds, the app helps users stay organised without endless menus or confusing interfaces.

"The whole point is simplicity," says Adams. "Gardening shouldn't feel like admin, and your growing plan shouldn't live on 15 pieces of paper taped to the fridge. This app gives gardeners clarity in seconds."

Launch Offer

To celebrate the launch, **Your Growing Companion** is available for:

\$9.99 Lifetime Access (December Only)

Includes all features, future updates, and unlimited use forever.

7-Day Free Trial

Try the full app before deciding.

From January 1st, 2026: **\$9.99 per year**.
