

NITE FLAG XL: The Patented LED-Illuminated Flag That Always Waves and Shines Day or Night

Revolutionary, interchangeable flag system brings American ingenuity to homes, businesses, and Veterans communities while fully compliant with U.S. Flag Code Section 6A

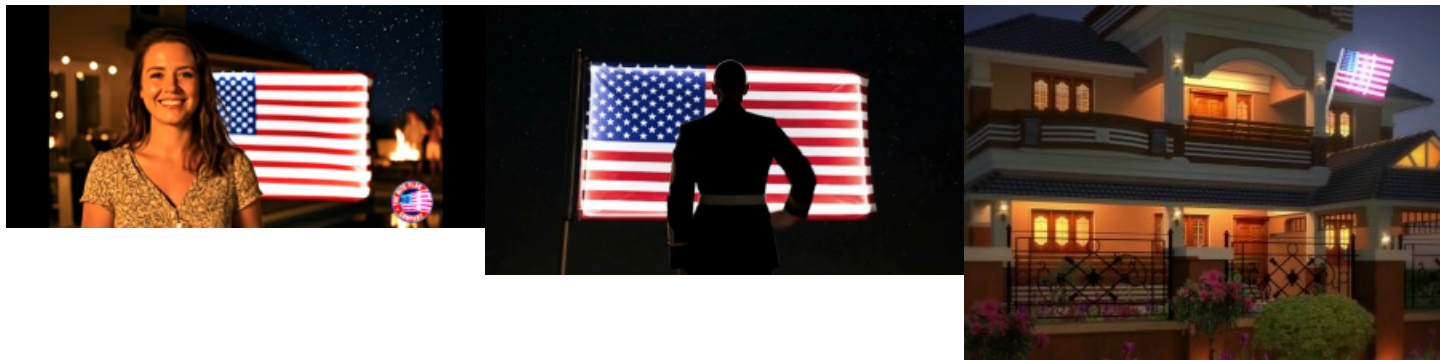

Atlanta, Georgia Nov 2, 2025 ([Issuewire.com](https://www.issuewire.com)) - Atlanta, GA The NITE FLAG XL is the world's first LED-illuminated flag system designed to always wave, never sag, and shine proudly through the night. This patented, fully interchangeable flag system allows users to instantly swap designs from the U.S. flag to team logos, business banners, or event flags, making it the ultimate solution for homes, tailgates, businesses, and organizations.

Created with American innovation and engineered for durability, the NITE FLAG XL features a kinetic FLEXI-LINK motion system and integrated LED illumination, fully compliant with U.S. Flag Code Section 6A. Made with marine-grade aluminum, weather-resistant materials, and minimal-waste interchangeable cases, it delivers a sustainable, long-lasting display solution.

Early A/B testing has shown exceptionally high interest from Veterans groups, highlighting the product's resonance with patriotic audiences. Now live on Kickstarter, the NITE FLAG XL campaign seeks funding to finalize production tooling, execute the first manufacturing run, and deliver backers their flags in late Q2 / early Q3 2026.

Backers of the NITE FLAG XL will be part of a 21st-century revolution in flag display, lighting up homes, vehicles, events, and businesses with pride and visibility. To support this innovative product and secure an early backer discount, visit
