

Oasis Capital Finance relocates from London to Singapore

Oasis Capital Finance Pte. Ltd. (OCF) today announced the strategic relocation of its holding company and all global operations from the United Kingdom to Singapore.

Singapore, Singapore Nov 3, 2025 ([IssueWire.com](https://www.issuewire.com)) - This forward-thinking transition underscores OCF's dedication to thriving in environments that foster global expansion, bolster investor trust, and enable agile decision-making. Amid evolving regulatory landscapes in the UK that have posed increasing hurdles for internationally focused financial institutions like OCF, Singapore emerges as an ideal base. Renowned for its exemplary governance, cutting-edge infrastructure, and forward-looking policies on cross-border investments, Singapore offers a vibrant ecosystem perfectly suited to OCF's ambitions.

Now positioned as the epicentre of OCF's worldwide activities, Singapore will empower the firm to deliver premium funding solutions and expert advisory services in the most exciting global markets and sectors, driving value for clients and partners alike.

Continuing Operations in Europe

While embracing Singapore as its new global headquarters, OCF will retain its longstanding and strong links to European clients, funding sources, partners, and financial markets. Senior management based at its London office will continue to play a key role in nurturing these essential relationships, working with Singapore to ensure seamless collaboration and continued access to Europe's dynamic financial landscape.

Exciting Horizon: Launch of the Global Opportunity Fund

Complementing this relocation, OCF, in collaboration with its investment partners, is gearing up for the imminent launch of the Global Opportunity Fund. Headquartered and managed from Singapore, this innovative fund will be led by a seasoned Fund Manager with deep-rooted connections across Asia and the Middle East. Leveraging this expertise, the fund will spearhead a portfolio of groundbreaking, asset-backed ventures and multi-jurisdictional lending programs designed to unlock high-potential opportunities.

OCF remains committed to its valued clients and introducers, continuing to curate and execute tailored funding strategies while gaining the added capability to finance select opportunities directly from its own resources. This evolution heralds a thrilling new era for OCF, amplifying its capacity to offer adaptable, high-return capital solutions and forge even stronger alliances spanning the globe.

Additional information on the Global Opportunity Fund will be shared as the launch approaches.
