

Quantics.io Unveils Refreshed Brand and Website to Power Next-Gen Supply Chain Planning

Vienna-based Quantics GmbH elevates its AI-driven supply chain planning platform and digital presence to support global enterprise manufacturers.

Vienna, Wien Dec 1, 2025 ([Issuewire.com](https://www.issuewire.com)) - Quantics GmbH ([Quantics.io](https://www.quantics.io)), a specialist in AI-driven supply chain planning software, today announces the official relaunch of its brand and website, signalling a new phase in its ambition to provide flexible “next-gen planning on your terms” to enterprise manufacturing clients worldwide.

Founded in 2020, Quantics brings together deep expertise in data science, software engineering and manufacturing supply chain operations. With innovation funding and years of product development behind it, the company has matured into a niche but growing partner for global manufacturers across five continents.

The newly launched website reflects Quantics' vision: high-impact planning solutions built for enterprise scale, delivered in a flexible, transparent, and sustainable way. The site emphasizes the core service portfolio: Demand Forecasting & Planning, Inventory Management, Production Planning & Cockpit.

Quantics' headquarter is located at Döblinger Hauptstraße 7/3/82, 1190 Vienna, Austria.

Key Highlights of Relaunch:

- A modern, responsive website designed for global enterprise audiences and multi-region language support (English, German).
- Clear articulation of the “Next-Gen Planning On Your Terms” positioning, which emphasises flexibility (SaaS to perpetual licence), enterprise scalability, and specialist service.
- Enhanced content on use-cases, industries (e.g., chemicals, food & beverage, metals, pharmaceuticals) and board-level outcomes (e.g., up to 70% more accurate forecasts, up to 80% faster planning, up to 40% lower inventory) drawn from Quantics marketing materials.
- Thought leadership section with insights into forecasting, S&OP, intelligent inventory strategies and more - supporting Quantics' commitment to authority in enterprise manufacturing planning.
- Seamless navigation for prospects: request-a-demo, solution overviews, industry pages, integration & security credentials.

Leadership & Team

Quantics is led by a seasoned leadership team:

- Christof Bitschnau - CEO: logistics & supply chain transformation veteran.
- Johannes Matt - COO/CTO: expert in scalable software architecture for manufacturing.
- Resul Akay - Chief Data Scientist: forecasting & optimisation specialist, former University of Vienna researcher and president of the [Time Series Analysis and Forecasting Society](#).

Why This Matters

“Today’s manufacturers operate in a world of constant disruption — where uncertainty, volatile demand, evolving trade dynamics, and accelerating technology place relentless pressure on costs and operations. Legacy ERP systems weren’t built for this reality. Quantics enables agile, intelligent planning that moves at the speed of your business, aligning seamlessly with your model, structure, and technology landscape,” said Christof Bitschnau, CEO of Quantics. “Our relaunch reflects that imperative: we deliver enterprise-grade innovative supply chain planning, but you get to define how, when and where you deploy it.”

Manufacturers seeking a planning platform that adapts to their terms are invited to visit the new site at <https://www.quantics.io/> and book a demonstration of how Quantics can transform your supply chain planning.
