

Rick Roco Announces New Summer 2026 Exhibition “VOYEUR” — Los Angeles, California

A Cinematic Pop Surrealist Breakthrough Event Poised to Become One of the Most Anticipated Art Exhibitions of 2026

Los Angeles, California Nov 2, 2025 ([IssueWire.com](https://www.issuewire.com)) - Contemporary pop surrealist painter [Rick Roco](#) has officially announced his next major exhibition, opening Summer 2026 in Los Angeles, California. Titled *VOYEUR*, this highly anticipated body of work is expected to redefine the pop surrealist genre, taking Roco's signature hyper-real cinematic oil painting technique into a new dimensional arena.

Roco was recently named one of the Bay Area's **Top 5 Most Popular Pop Surrealist Artists**, and collectors have been aggressively pursuing his work. Every single micro-collection he has released has sold out — often within days — with secondary collectors already describing his paintings as “one of the strongest emerging investment plays in the contemporary art market.” Industry analysts are already calling this period the **inflection point year** for Roco — where his market transitions from niche cult favorite to global collectible category.

VOYEUR was inspired by Roco's current collaboration with a film director on a feature project slated for release in 2027. The series explores psychological intimacy and the surreal eroticism of being viewed, interpreted, and desired from multiple unseen dimensions. The new works are more volumetric, more

three-dimensional, and more filmic than anything Roco has ever produced — pushing pop surrealism into a cinematic hyperreality.

Roco states:

“Being able to share these visions with the world... and to have people actually connect with them and fight to own them — it’s surreal. I’m humbled by all of it. The fact that collectors believe in me this deeply is one of the greatest feelings an artist can experience.”

The exhibition is invitation-only. Official opening date announcement coming soon.

Roco is also preparing to release his first published art book and is finalizing a collaboration with a major collectible toy manufacturer — expanding his visual universe beyond canvas into physical, limited edition sculptural culture.

About Rick Roco

Rick Roco is a Bay Area pop surrealist painter known for his hyperreal oil painting techniques, emotionally charged atmosphere, and cinematic visual storytelling. His work merges psychological narrative with surreal material reality — building a uniquely identifiable visual language that continues to escalate in collector demand across the United States and internationally.
