

SAM Corporate Launched SAMESG® Lite at Singapore FinTech Festival 2025

Dubai, United Arab Emirates Dec 20, 2025 ([IssueWire.com](https://www.issuewire.com)) - The Singapore FinTech Festival (SFF) is one of the world's most influential platforms for discussions at the intersection of finance, technology, sustainability, and regulation. Each year, it brings together policymakers, industry leaders, innovators, and solution providers to address global shifts shaping the future of business.

At SFF 2025, SAM Corporate, a global advisory and technology firm, presented its perspective on making sustainability more accessible, decision-focused, and scalable for businesses of all sizes. Over the years, SAM Corporate has supported large enterprises and financial institutions through its ESG reporting platform, SAMESG®, enabling audit-ready disclosures aligned with global standards such as ISSB, GRI, and more.

Building on this foundation, SAM Corporate introduced SAMESG® Lite, the next step in its ESG vision.

The solution was officially launched on 12 November at 10:30 AM at the GPRNT booth during the session “Democratizing ESG Disclosures: A Beginner’s Journey for Small and Mid-sized Enterprises”. The launch was led by Dr. Sunil Kumar, Managing Director and Co-Founder of SAM Corporate, together with Deepika Chawla, Head of APAC.

The launch of [SAMESG® Lite](#) marked an important step in SAM Corporate’s mission to make sustainability adoption practical and accessible for businesses of all sizes. Designed for organizations in the early stages of their ESG journey, SAMESG® Lite enables companies to calculate and report Scope 1, 2, and 3 emissions using standardized, globally recognized methodologies.

By simplifying emission reporting, SAMESG® Lite helps bridge the gap between ESG ambition and implementation. It provides SMEs and value chain partners with a structured, guided entry point into sustainability disclosure, supporting alignment with customer requests, supply chain requirements, and evolving compliance expectations.

The unveiling of SAMESG® Lite reinforced SAM Corporate’s broader 360° approach, integrating technology and advisory services across ESG, Corporate Performance Management, regulatory reporting, and BFSI advisory. Its presence at the event highlighted its commitment to enabling organizations to make informed, connected, and future-ready decisions.
