

Satoshi Mobile Launches the World's First Global Data Telecom Company With Free Crypto-Earning Smartphones

Guayama, Puerto Rico Nov 2, 2025 ([Issuewire.com](https://www.Issuewire.com)) - [Satoshi Mobile Network Inc.](https://www.SatoshiMobileNetwork.com), the world's first blockchain-powered, DAO-governed global data telecom company, is proud to announce a revolutionary leap in mobile connectivity: free smartphones that earn cryptocurrency daily. Beginning November 1, 2025, Satoshi Mobile will launch across 142 countries, empowering users to experience mobile services while generating income through walking, referrals, and network participation.

At the heart of this new ecosystem is the Satoshi Mobile Coin (SMBLE), a utility and equity token that fuels the platform's economy. With over 5,000 active traders and a rapidly growing base of 8 million customers, SMBLE is poised to debut on the WEEX exchange, supported by a community of users who both power and promote its value.

Every Satoshi Mobile device unlocks free services including unlimited data, app-based calling, and global connectivity—all while earning SMBLE coins for everyday activity. Subscribers enjoy savings of up to 50% compared to traditional telecom providers, while also gaining tokenized ownership in the company's DAO-driven model.

"Connectivity should be free, rewarding, and borderless," said Mr. Garcia, spokesperson for Satoshi Mobile. "Satoshi Mobile is creating a future where mobile services don't just connect people—they create opportunity for everyone."

Join the Movement

Sign up today, earn your free crypto-earning phone, and become part of the world's first truly global, community-owned telecom revolution.
