

Servotech Inc. Launches Advanced Mechatronics Engineering Services to Empower Next-Gen Automation

Chicago, Illinois Nov 20, 2025 ([IssueWire.com](https://www.IssueWire.com)) - Servotech Inc. is proud to announce the expansion of its engineering portfolio with [Mechatronics Engineering Services](#), offering end-to-end design solutions at the intersection of mechanics, electronics, and embedded control. Through its mechatronic design unit, Servotech delivers integrated systems combining precision mechanical subsystems, real-time embedded software, and smart sensor-actuator networks. Leveraging tools like MATLAB/Simulink, Hardware-in-the-Loop (HIL), and advanced ECU development, the company enables customers to accelerate innovation, reduce development risk, and achieve optimal system performance. With decades of expertise in system-level integration, Servotech Inc. is positioned to support industries ranging from electric vehicles and robotics to industrial automation.

About Servotech:

Servotech Inc. is a global leader in engineering services, specializing in embedded control, CAD/CAE, finite element analysis (FEA), and mechatronic system development. The company's mission is to deliver intelligent, reliable, and high-performance solutions tailored to the needs of its clients. Learn more: <https://www.servotechinc.com/mechatronic-design>
