

Shanghai Link Instruments Announces Continued Global Expansion in Ophthalmic and Optical Manufacturing

Shanghai, China Nov 19, 2025 ([IssueWire.com](https://www.IssueWire.com)) - [Shanghai Link Instruments Co., Ltd.](https://www.ShanghaiLinkInstruments.com), a leading manufacturer of ophthalmic and optical equipment, today announced its continued growth in international markets as the company strengthens its R&D capabilities and expands product offerings to meet rising global demand for high-precision vision diagnostic solutions.

Founded in 2009, Shanghai Link Instruments has accumulated more than 15 years of professional experience in the ophthalmic industry. The company integrates research and development, product design, manufacturing, and global service within a unified operational system. Its modern facility in Shanghai is equipped with advanced optical testing devices and precision assembly lines, ensuring consistent quality and stable performance across all product categories.

The company's product portfolio includes Auto Refractometers, Phoropters, Slit Lamps, Lensmeters, LCD Charts, Chair & Stand Units, and Trial Lens Sets. All products are manufactured under stringent quality management and certified with ISO 9001, ISO 13485, CE, and FDA standards. With a strong emphasis on accuracy, reliability, and user-friendly design, these instruments are widely used in clinics, hospitals, and optical centers worldwide.

A spokesperson for Shanghai Link Instruments stated that the company will continue to enhance technological innovation, optimize its production system, and expand global partnerships to better serve international distributors and medical institutions.
